Company Brochure

About Us

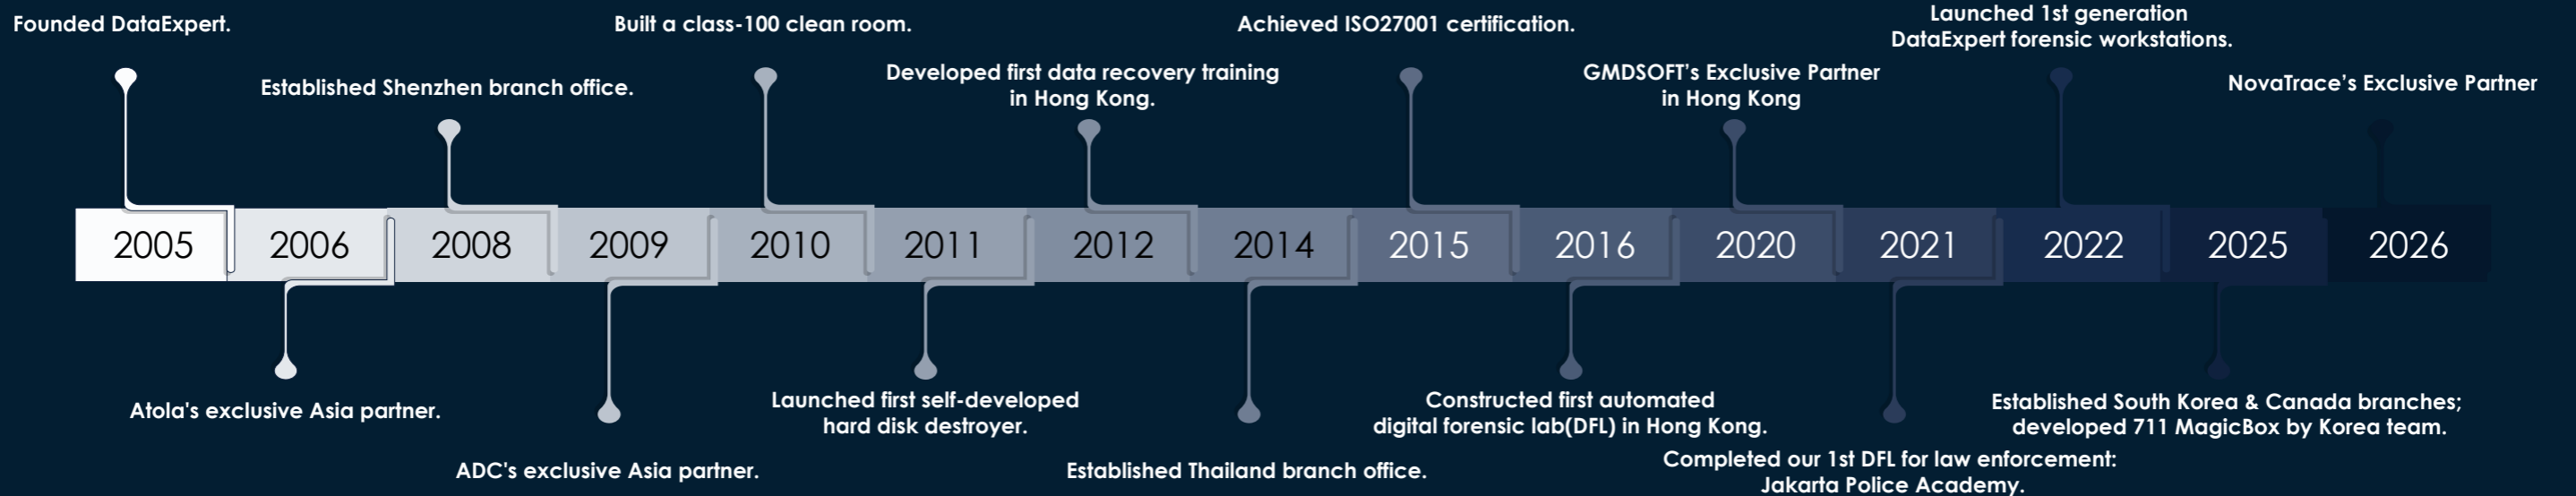

Established in 2005, DataExpert has been one of the leading suppliers in IT security industry in Asia. We develop, manufacture and distribute professional products in the fields of data recovery, data erasure, data destruction and digital forensics. Closely following the latest technologies, we always provide the most advanced IT assets management solutions for our clients, including government departments, organizations, enterprises, banks, SMEs and individuals all over the world. We have constructed close partnership with competitive companies from Greater China, Singapore, Japan, Korea, US, Canada and other regions.

Professional Services

Experienced and professional service for finding the electronic evidence.

Our advantages

- ✓ Over 20 years in digital forensic services
- ✓ 1st digital forensics laboratory in HK
- ✓ Professional Service Ethics
- ✓ Comprehensive Service Scope

What is Digital Forensic?

Digital forensics, as a science, is the process used to acquire, preserve, analyze, and report on electronically stored information using scientific methods that are demonstrably reliable, verifiable, and repeatable.

Digital forensic can apply for:

- Employees fraud
- Investigation of personal computer
- Private investigation of cellular phone
- Inappropriate data duplication
- Intellectual property fraud
- Breach of contract
- Inappropriate Internet & Email Usage

Our Promise

Digital Forensic Service Principles

Principles

- Actions taken should not affect the integrity of original data
- Investigator conducting examination must be well trained and positioned at senior level
- Actions taken during seizure, examining, storage or transfer must be documented timely and accurately
- Determine the course of each action in forensic sound manner

Our Team

Qualifications

- IACIS Certified Forensic Computer Examiner (CFCE)
- IACIS Certified Mobile Device Examiner (ICMDE)
- Cellebrite Cellphone Certified Investigator in CCPA and CCLO
- HancowITH Certified Mobile Forensic Professional
- Meiya Pico Certified Examiner of Mobile Forensic System
- Meiya Pico Certified Examiner of Forensic Master
- Certified Information Systems Security Professionals (CISSP)
- Microsoft Certified System Engineer + Internet (MCSE+I)
- SUMURI Mac Forensics Examiner
- Magnet Certified Forensic Examiner (MCFE)
- Belkasoft Certified Examiner (BelkaCE)
- HRSS Digital Forensic Examiner (Intermediate)
- Cisco Certified Network Associate (CCNA)
- Flash Device Pinout Analyst
- CipherTrace Certified Cryptocurrency Examiner

Membership

- Member of High Technology Crime Investigation Associate (HTCIA)
- Member of International Association Computer Investigation Specialists (IACIS)

Forensics Laboratory & Class 100 Cleanroom Based Data Recovery Service.

Types of Failures

Logical Failure

- Delete files wrongly
- Boot failure
- Data loss due to formatting/OS upgrade
- Database failure
- Unusual encryption

Physical Failure

- Wear and tear of parts
- Collision
- Flooding
- Fire
- * Open case checking or chip-off data recovery may be needed

Class 100 Cleanroom

As to maximum the chance of recovering your data, DataExpert is beware on every step may affect the possibility of data recovery. The contaminants in the air can cause physical media damage and destroy the data if the hard disk open in normal surrounding. Therefore, DataExpert setup a **Class 100 Cleanroom** which ensures the **air contains no more than 100 dust particles per cubic foot** to prevent the physical damage.

Our advantages

- ✓ ISO/IEC 27001:2022 certified
- ✓ Chip-off data recovery for severe damage
- ✓ Class 100 Cleanroom
- ✓ Recovery for different types of media, OS and file

Our Promise

Your data is unparalleled safe in DataExpert

- DataExpert Technology Limited got **ISO/IEC 27001:2022 Information Security Management** certified by BSI under certificate number IS 642998, for the scope of "The provision of data recovery and disposal services".
- We shall treat all material supplied by the client as confidential and shall not divulge any confidential information to any person.
- All employees in DataExpert have signed NDA and guarantee not to disclose any client information.

Chip-Off Data Recovery

For the severe damage, we need to remove the chips from the failed devices and read the chip contents by flash data recovery tools.

Support Types

Media

- Hard drive, micro drive, RAID, NAS, SAN, etc
- CD/DVD/Blue ray optical disc
- PC, tablet, cellphone, smartphone
- SSD drive, CF, SD card, Mico SD, MS, USB drives
- Magnetic tape (DLT, LTO etc)
- Digital albums frame, MP3/MP4 player, PDA
- iMac, Macbook, Powerbook, iPhone, iPad, iPod, etc
- SyQuest, MO, JAZ, ZIP, floppy diskettes

OS

- Windows 2000/XP/Vista/7/8/10/11
- Windows 95/98/98SE/ME
- Mac OS
- Unix, Linux
- Novell NetWare
- All database systems
- Windows NT/Server2003/Server2008/Server2012
- DOS/Windows 3.X
- APFS
- iOS, Android, Windows Mobile, Symbian, etc
- OS/2

File

- Pictures and videos
- Browsing history
- Instant messengers
- Peer-to-peer software
- System files
- Emails
- Mobile applications
- Office documents
- Windows registry
- Encrypted files

Implementation Plan

Service	Stage 1: Analysis	Stage 2: Data Recovery
Priority	1 - 2 workdays	1 - 2 workdays
Standard	3 - 4 workdays	3 - 4 workdays
Onsite	1 workday	1 workday

Work Flow

Consultancy

- Contact your consultant by sending email to info@dataexpert.com.hk or calling at **+852 3590 2115**.
- **No consulting fee.**

Media Collection

- Hand over your media to DataExpert office, or Media Collection
- Make an reservation of onsite collection (**free of charge**)

Analysis

- Analyse the media to find out the cause of fault.

Analysis Report & File List

- Generate a list of file that can be recovered.

Data Recovery

- IT engineer will recover the files assigned by client.

Delivery

- We will return the original media and a new media with recovered files to client.

Technical Support

- All recovered data will be **kept for 30 days** before permanently deleted, feel free to contact us for futher

Case Study

Hard disk data recovery for a school fire

In 2007, there was a fire in a Hong Kong secondary school. The server which contained all final exam questions were burnt severely and some of the hard disks were burnt or deformed. DataExpert tried to recover the data by open case data recovery in Class 100 Cleanroom and RAID data recovery. Finally, 50% of the data were recovered successfully which included all the exam questions.

Build your own digital forensic laboratory (DFL).

Why Digital Forensic Laboratory is Needed?

Optimize electronic devices management processes to better support digital forensic practitioners.

Enhance digital forensics capabilities in high-tech crimes investigation.

Establish guidelines for the intake, marking, tracking, protection, handling and return of the evidence in the Digital Forensic Laboratory.

Get access to fully validated hardware and software to produce the court acceptable results.

Advantages of DFL

Our advantages

- ✓ Consist of a highly experienced team of talented digital forensic professionals
- ✓ First and only commercially operated digital forensic laboratory in Hong Kong
- ✓ Commit to more than 20 high quality DFLs to law enforce agencies worldwide
- ✓ Meet the unique requirements by providing a customized solution

COMPLIANCE

Our FLIMS ensures that the process implemented in the Forensic Lab, follows the ISO/IEC 17025 General Requirements for the competence of testing and calibration laboratories to ensure that all instruments and calibration are done in accordance to the International Standards, that governs the laboratory :

- ISO Procedures
 - Publications and Forms
 - Laboratory Wide Documents
 - Procedures
- Technical Procedures
 - Digital Evidence Management
 - DNA Database
 - Drug Chemistry
- Firearm and Tool Mark
- Forensic Biology
- Latent Evidence
- Toxicology
- Trace Evidence

Example of Simple FLIMS Model

Forensic Lab Information Management System—FLIMS

SOLUTION OVERVIEW

Forensic laboratories rely heavily on lab centric technologies to collect and analyze evidence. To keep pace with increasing volumes, it is important that these organizations leverage technology to enhance the productivity and accountability of their examiners and overall operations. FLIMS is a full featured Forensic Laboratory Information Management System (FLIMS) that offers the flexibility, scalability and reliability necessary to ensure the smooth operation of a forensic laboratories.

FLIMS utilizes Thin Client technologies that allows a centralized management system from the Central Forensic Laboratory System to managed multiple Laboratories in different Sites, FLIMS also designed as modular software, which allows multiple phase implementation in order to provide better cost management for the Laboratories. These module includes ; Case Management System, Chain of Custody systems, Evidence Management System, Integrated Cyber Security System, and other Tailored Functions.

F-LIMS

- CASE MANAGEMENT
- CHAIN OF CUSTODY
- EVIDENCE MANAGEMENT
- INTEGRATED CYBER SECURITY
- DOCUMENT MANAGEMENT
- ISO/IEC 17025 COMPLIANCE SYSTEM
- ADVANCED USER MANAGEMENT
- TAILORED FORENSIC DIVISION SYSTEM
- MOBILE MANAGEMENT SYSTEM
- MONITORING SYSTEM.

Turn Key Solutions for your Laboratory Needs

SCALABLE & INTEGRATED

FLIMS featured a fully scalable and integrated solution that allows the Laboratory managers to decide on which module they would like to implement first, and how many locations they need to be integrated with the LIMS with centralized repository system, it also features the following capabilities :

- Thin Client Architecture
- Web Based Applications
- Centralized or Distributed Repository System
- Distributed Processing
- Smart Resource Management

END TO END

FLIMS provided end to end features to suits the Forensic Laboratory requirements in different institutions or in different countries, it can also ensure that the Business Process and Standard Operating Procedures complied with the ISO/IEC 17025 Standards for Lab Accreditation recognized internationally. It caters all requirements from the Chain of Custody, Evidence and Case Management, and more importantly it features a mobile apps that can be accessed by Lab Analyst in the field.

FORENSIC LIMS THAT PROVIDES A TOTAL END TO END SOLUTION.

TAILORED SOLUTIONS

The difference between FLIMS compared to other solutions in the market is that FLIMS are able to be fully customized for different Forensic Laboratories standard,

.while at the same time able to maintain the International Best Practice Standards. It can also be integrated with a Monitoring System for Laboratory Manager and Management to monitor Case progress, Budget and Expenditures, to better managed the Lab in more efficient manner.

Our Turn Key Solutions Capability Summary

- Platform Independent Model
- Web Based / Application Based
- Supports Mobile Platform
- Integrated Monitoring Center
- Integration with other Laboratory System
- Forensic Laboratory Equipment Procurement

CUSTOM SOLUTIONS

- Smarter Forensic Lab
- Reduced Integration Cost
- Improved Quality and Compliance
- Improved Efficiency
- Easily Support New Requirements
- Scalable Systems
- Integration With Legacy Systems

WEB SOLUTIONS

- Reduced Implementation Cost
- Centralized Repository System
- Improved Case Management
- Secure Evidence Management
- User Access Control
- Accessibility Everywhere
- Distributed Processing

MOBILE SOLUTIONS

- On Demand Access
- Mobile Lab for Analyst
- Increase Processing Speed
- Improved Chain of Custody
- Evidence Documentation
- Multiple Analyst Deployment

All-rounded data disposal services fit for different compliance and standards.

Our advantages

-  ISO/IEC 27001:2022 certified
-  Wide-ranging solutions for different standard
-  All-rounded solutions for different media
-  One-stop Service

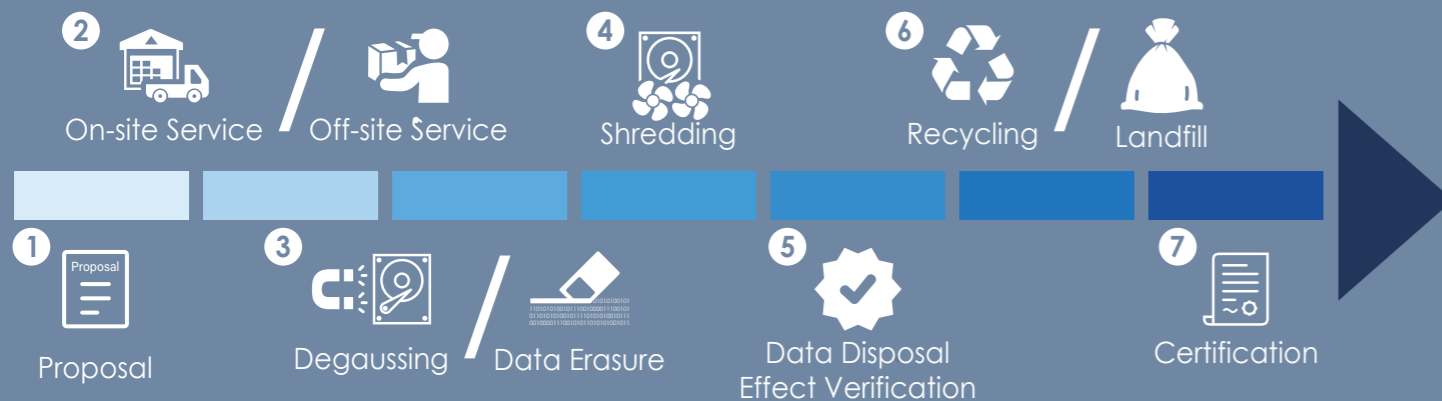

Our Promise

IT Asset Disposition Service

Proposal

1

Receive your enquiry of **media type, number** and **standards & compliance**.

2

Assign a **project manager** to follow up your case.

3

Project manager will prepare a proposal which fit for your need.

Logical Destruction

Degaussing

Conduct degaussing on each magnetic media with a qualified degausser which can generate magnetic field at least **1.5 times** higher than the coercivity (resistance to demagnetization) of the media.

Degausser Magnetic Field Intensity

MagWiper MW-15X	MagWiper MW-25X	MagWiper MW-30X	MagWiper NSA Degausser
Approx. 10,000 Oe			Approx. 20,000 Oe

Degaussing Effect Verification - Magnetic Checker Cards (Recommended 20% samples)

1. Before being degaussed, check checker card shows the given pattern of "DATAEXPERT".
2. Place the magnetic checker card into degausser chamber together with the target media.
3. After degaussing, the particles of the card are randomly distributed if the media has been degaussed successfully.

Before Degaussing

After Degaussing

Labeling

Label each magnetic media as **"100% degaussed"** after full completion of degaussing.

Wiping/Erasure

Wiping offers a secure data destruction solution by **overwriting the media in specific patterns**. It allows client to erase data permanently and securely, while **keeping the media usable**. However, wiping is not always successful when dealing with malfunctioning media.

Physical Destruction

Shredding

By cutting storage media into small particles, it provides an additional protection for degaussed media, and an unparalleled choice for media which failed to wipe normally.

Recycling and Disposal

Recycling

Recycle degaussed/wiped media by Hong Kong Environment Protection Department (EPD) authorized computer recycler.

Landfill (for non-recyclable E-waste only)

Landfill non-recyclable residue according to the Waste Disposal Ordinance under Hong Kong Law.

Reporting

Document and Certificates

DataExpert services are in accordance with international data security standards. We can provide auditable tracking document and certificates.

Digital Forensic and
Incident Response

Forensic Workstation

Cyber MZR-X

All-in-one solution for digital forensic laboratory.

Write-Blocker & Read/Write Interfaces

Specification

Model	Cyber MZR-X
OS	Win11 64 bits OS
CPU	Intel Z790 Chipset CPU Intel i9-14900K
Memory	128GB DDR5 4800MHz

Allows customize the hardware to support several high-demand forensic software.

Forensically sound design

4 main functions of software

Software with essential functions for investigation needs

The software encompasses imaging, hashing, wiping, and audit report functions, catering to the fundamental requirements of investigators.

Multi-languages interface

The software offers a user interface in three languages: English, Japanese, and Chinese.

Build-in forensic imaging software

Specifically designed for on-scene

Army-grade casing

The casing is made of sturdy metal material, durable and impact-resistant.

Dedicated carrying bag

The bag offers excellent protection for MZR-P, and its internal compartment is designed to conveniently store accessories.

Dedicated carrying bag

Tri-Fold Workstation

Minimize space, maximize efficiency for your investigations.

Write-Blocker & Read/Write Interfaces

Different Perspectives

Specification

Model	MZR-TF
OS	Windows 10/11 64 Bit Professional (Eng)
CPU	Intel i9-12900T (16 Core; 24 thread; 1.4GHz max 4.9GHz)
Memory	32GB (16GB x 2) DDR4 3200MHz (upgradeable to 64GB)
Hard Drive	2TB M.2 NVME SSD 4TB SATA SSD (optional)
Write-Blocker Interfaces	PCI-E x 1 USB 3.0 x 1 SATA/SAS x 2
Read/Write Interface	USB 3.0 x 8 SATA/SAS x 2
Others Interface	Bluetooth 4.0 / WiFi Bulit-in Mechanic Keyboard and mouse pad Audio in/out RJ45 Ethernet Port
Display	Trifold 14 inch FHD Display with 1920 x 1080 resolution
Dimension	360 x 310 x 108 mm (L x W x H)
Accessories	13A AC power Cable 180W DC power source Carrying Case

* Customized Configuration available. Powered by DataExpert.
* Specifications are subject to change without notice.

Hardware specifically designed for forensic

Forensically sound design

Easy to distinguish write blocker & read write area to reduce the human error.

Multi-interface write blocker

Built-in write blocker with multiple interfaces for forensic investigation of various devices or media.

High performance hardware

Allows customize the hardware to support several high-demand forensic software.

Forensically sound design

4 main functions of software

Software with essential functions for investigation needs

Multi-languages interface

The software offers a user interface in three languages: English, Japanese, and Chinese.

Build-in forensic imaging software

Specifically designed for on-scene

Tri-fold monitor with a compact design

The tri-fold monitor's compact design saves space while delivering versatile multi-screen productivity.

Dedicated carrying case

The carry case offers excellent protection for Forensic Cube v5, and its internal compartment is designed to conveniently store accessories.

Folded view

Forensic Laptop

High performance laptops design for field or lab forensic investigation.

Specification

Model	Forensic Laptop
Operating System	Windows 11 Pro 64-bit
CPU	Intel Core Ultra 9 275HX (Max Turbo boost up to 5.40 GHz), 8 P-cores & 16 E-cores / 24 threads
Internal Memory	128GB Dual Channel DDR5 SDRAM @ 4000MHz (2x64GB)
GPU	NVIDIA GeForce RTX 5080 (16GB GDDR7 VRAM)
Storage system	2TB M.2 NVMe SSD for the Operating System 2TB M.2 NVMe SSD for Evidence Drive 2TB M.2 NVMe SSD for Temp Files 2TB M.2 NVMe SSD for Storage
Display	18" QHD+ (2560x1600) 240Hz WVA, 72% DCI-P3, Matte
Dimensions	39 x 28 x 2.5 cm
Weight	3.5 kg
Warranty	3-Year Limited Warranty

* Customized Configuration available. Powered by DataExpert.

* Specifications are subject to change without notice.

Forensics Write Blocker

Integrated write-blocker supports 7 storage media types.

Supported storage media :

USB 3.0/2.0/1.0,PCI-E(with PCIe Adapter),SATA, CF/M2/TF/SD/MMC/MS/xD

Specification

Model	DE-WB-A1S
Interface Front Panel	
PCI-E	One PCIe Custom data + Power connector
USB 3.0	One USB 3.0 Standard-A Connector
IDE	One IDE Signal Connector
DC Out	One DC out 4pin drive power connector
Switch	
DIP Switch	Two position DIP Switch configures Write Protect (WP) or Write Blocker (WB)
Other feature	
Status LED	4 LEDs: Host (Detect), Activity(Act), Write-Block(Disk), Read-Write (RO)
Host/Computer Interface Compatibility	
USB 3.0 Controllers	Most USB 3.0 Controllers should be compatible
Host OS	Windows 7, 8 10 Macintosh OS X Most modern Linux distributions
HPA	Support HPA Unlock and Reset
LED Indicator	Color LED Indicators for "Host", "Write Block" or "Read/Write" mode visibility
Size	148 x 81 x 43mm (L x W x H)
Warranty	One Year Warranty and Free Firmware upgrade

*Remark: Made in Hong Kong and powered by DataExpert

*Specifications are subject to change without notice

Portable Write Blocker Series

Compact write blocker for securely access digital data during forensic investigations in everywhere.

Product Detail

Write Blocker U

- Lightest model
- Device information and transmission speed are displayed on the screen.

Write Blocker P

- Folding design
- Extract data from both PCIE U.2 and SATA ports without requiring any accessories

Write Blocker M

- Comprehensive solution for extracting devices from multiple interfaces
- With Apple transfer kit which can extract data from MacBooks of different models

Specification

Write Blocker M

FORENSIC LAPTOPS

TALINO KA-L ALPHA

The SUMURI TALINO KA-L Alpha is an extremely portable Forensic Workstation specifically designed to perform faster than most desktop forensic workstations. We introduced this system for several reasons as many agencies just need a really good laptop that they can depend on to process small cases, work out in the field, collect mobile phone data, or a variety of other tasks.

TALINO KA-L GAMMA

The SUMURI TALINO KA-L Gamma is a portable Forensic Workstation specifically designed to perform just as fast as other desktop forensic workstations. This system was created to meet the needs of agencies who've both come to expect the speed and power from our renowned portable TALINO Forensic Workstations, and are looking for a middle ground between our other portable offerings.

TALINO KA-L OMEGA

The SUMURI TALINO KA-L Omega is the fastest portable Forensic Workstation specifically designed to perform just as fast as most desktop forensic workstations. In fact, this powerhouse might actually be more powerful than your current forensic workstation, unless you have a full sized TALINO desktop Forensic Workstation.

TALINO KA-L eDISCOVERY

The SUMURI TALINO KA-L eDiscovery & Incident Response laptop is our high-end eDiscovery incident response laptop aimed specifically for the modern-day forensic examiner tasked with handling incident response type examinations. The SUMURI TALINO KA-L eDiscovery & Incident Response laptop, is our high end eDiscovery incident response laptop aimed specifically for the modern-day forensic examiner tasked with handling incident response type examinations.

RUGGEDIZED LAPTOP

The SUMURI TALINO TRL-65 is our no compromise ruggedized laptop. When you need both dust proofing and water resistance in one package along with as little sacrifice as possible when it comes to performance, the TRL-65 is your very best choice! It features a whopping six-foot drop protection, and like all TALINOs, there are tons of customization options and you will find the same awesome three year warranty you've come to know and love.

TALINO WORKSTATIONS

CRYPTANALYSIS WORKSTATION

An extremely fast and efficient decryption system featuring Intel CPUs and NVIDIA Graphics Cards combined with our proprietary 3mm aluminum heat dispersing chassis. All the horsepower you need to run Passware, Elcomsoft or any other cryptanalysis solution.

FORENSIC WORKSTATION

The SUMURI TALINO KA brand of computers is built on the most reliable and stable platform designed by Certified Forensic Computer Examiners. Each custom workstation is built with expandability and a future proof mindset so that you are not replacing the computer every few years with an entirely new computer.

eDISCOVERY WORKSTATION

An extremely fast and efficient decryption system featuring Intel CPUs and NVIDIA Graphics Cards combined with our proprietary 3mm aluminum heat dispersing chassis. All the horsepower you need to run Passware, Elcomsoft or any other cryptanalysis solution.

NUIX POWERED WORKSTATION

The SUMURI TALINO NUIX Forensic Workstation is our specialized high-end dual Intel CPU system. This system was designed by our certified forensic computer examiners and NUIX engineers specifically to run NUIX. The power of TALINO married to the strength of NUIX is a match made in heaven.

THE POWER AND VERSATILITY OF TALINO - ACCEPT NO SUBSTITUTES

Here at SUMURI we take the greatest pride in building the very best forensic workstations anywhere. All of our TALINOs are designed by Certified Forensic Computer Examiners because we believe that the person who best understands what the modern examiner needs is someone who knows forensics! Using our unique and proprietary chassis, we accomplish two major goals:

- 1.) Separate the electrically sensitive components from those that produce more EMI and heat.
- 2.) Since the entire chassis is made of aluminum, we can utilize its entire surface area to help spread and dissipate heat.

Both of these effects help ensure your TALINO runs as smoothly as possible and lasts as long as an examiner needs it!

We use only the highest quality components that have been tested and vetted here in our lab. Our Laptops are designed and optimized for forensics and come with an industry leading 3 year warranty.

Every all TALINO workstations and laptops are built based... on your unique requirements and to our exacting standards. No competitor offers ANYTHING close!

Every TALINO workstation is burned in for 72 hours using multiple stress testing and benchmarking tools. The goal of our quality assurance team is to try and "break" the workstation before shipping it. From logical stress tests to actually physically altering the airflow in the TALINO we do everything in our power to make sure no TALINO leaves the lab until it has been put through the wringer. This is backed by our industry leading 3 year warranty and lifetime access to our support line for every TALINO user. Day or night we are there when you need us.

TALINO SERVERS

SERVER SOLUTION

The SUMURI TALINO KA Server Solution family brings everything great about TALINO KA workstations to server form factor computing in the big data arena, all designed by Certified Forensic Computer Examiners. Whether you're looking to store several hundred Terabytes for your lab or you need Petabytes for body camera footage we've got you covered. With multiple processing nodes available our designers can build you the server that you need at a price you can't beat.

ABOUT SUMURI

SUMURI is a leading worldwide provider of solutions for digital evidence and computer forensic Training, Hardware, Software, and Services. SUMURI is also the developer of the industry standard PALADIN Forensic Suite, CARBON Virtual Forensic Suite, RECON ITR, RECON LAB, and TALINO Forensic Workstations.

Computer Forensic

The first and only forensic data acquisition tool that works with both good and damaged media.

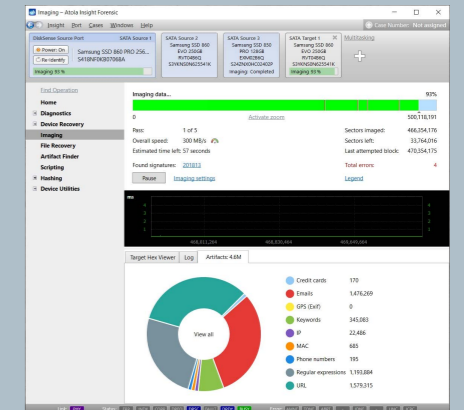

Functions

Forensic Imaging

- 3 simultaneous imaging sessions + multi-tasking
- Imaging session speed up to 500 MB/s
- E01, AFF4 or Raw target images created in the network or on target drives
- Up to 3 targets per imaging session
- Support of SATA, IDE, USB drives
- Via extensions: SAS, Apple PCIe (2013 - recent models), NVMe and M.2 PCIe SSDs
- Built-in hardware write blocker for all source ports

Damaged drive support

- In-depth automated drive diagnostics
- Multi-pass imaging of damaged drives
- Automated imaging of freezing media
- Bad sector recovery
- Segmented hashing for bad drive's image verification
- HDD current monitoring for continuous diagnosis

Forensic feature set

- Unknown ATA password extraction
- Locate sectors - detect which files and partitions they belong to specified drive sectors
- On-the-fly sector-level Artifact finder based on Intel Hyperscan engine
- Hash calculation (linear and segmented): MD5, SHA1, SHA224, SHA256, SHA384, SHA512
- Wiping methods including DoD 5220.22-M, Secure Erase, NIST 800-88, Pattern Erase
- Forensic file recovery for NTFS, APFS (with encrypted volumes), XFS, ext4/3/2, ExFAT, HFS/HFS+, FAT32, FAT16
- Case management system automatically generates detailed reports
- Comparison of 1 drive against 3 drives or images
- Detection and lifting of HPA and DCO restricted areas
- SSD Trim

Workflow

Atola TECHNOLOGY Product comparison

	Atola TaskForce 2	Atola TaskForce	Atola Insight Forensic
Imaging			
Simultaneous imaging sessions	25+	12+	3
Cumulative imaging speed	25 TB/hour	15 TB/hour	4 TB/hour
Automated RAID configuration detection	Support RAID 0, 1, 5, 6, 10 and JBOD		-
Automation	Web API		-
Damaged drive support	Damaged heads, freezing drives, short circuit detection, worn-out HDDs/SSDs		
Head selection support	✓	✓	✓
Network	2 x 10Gb Ethernet ports		-
Express mode	up to 25 imaging sessions	up to 17 imaging sessions	-
Logical imaging to L01	✓	✓	-
Imaging targets	E01/RAW/AFF4 files located on other drives (Veracrypt-encrypted as option), E01/RAW/AFF4 files located on a server or NAS, bit-to-bit copy on other drives		
Max. targets per imaging session	5	5	3
Hardware unit			
Ports	26 ports with source/target switch	18 ports with source/target switch	10 ports Cannot switch source/target
Port types	4 NVMe M.2/U.2 PCIe 4.0 8 SATA 8 SAS/SATA 4 USB 1 IDE Extension port	6 SATA 6 SAS/SATA 4 USB 1 IDE Extension port	6 SATA 6 SAS/SATA 4 USB 1 IDE Extension port
Write protection	on all ports (configurable)	on all ports (configurable)	on source ports
Extension modules	M.2 NVMe/PCIe/SATA Apple PCIe Thunderbolt	M.2 NVMe/PCIe/SATA Apple PCIe Thunderbolt	M.2 NVMe/PCIe/SATA Apple PCIe Thunderbolt SAS
Interface	web-based (offline)		Windows application
Wi-Fi mode	External adapter (optional)		-
Standalone mode	Kiosk mode	✓	-
Server rack compatibility	✓		
Other features			
Drive diagnostics	PCB, Heads, Media scan, Firmware, File system, Imaging time estimate.		
Wiping	Zero-fill, Custom pattern, LBA number, Secure Erase, DoD 5220.22-M, NIST 800-88, Random, Format NVM and Sanitize for NVMe drives		
Hashing	MD5, SHA1, SHA256, SHA512		
Case management	✓	✓	✓
Automatic report generation	✓	✓	✓
Other Common features	SSD Trim, HPA, DCO, AMA recovery, Segmented hashing, Source drive files preview		
Special features for Insight Forensic Only	-	-	Unknown ATA password recovery, Locate sectors, Artifact Finder (sector-level), File recovery, Scripting, Disk editor (HEX)

An on-scene and large-scale acquisition tool capable of working with both good and damaged media, developed specifically for forensic use.

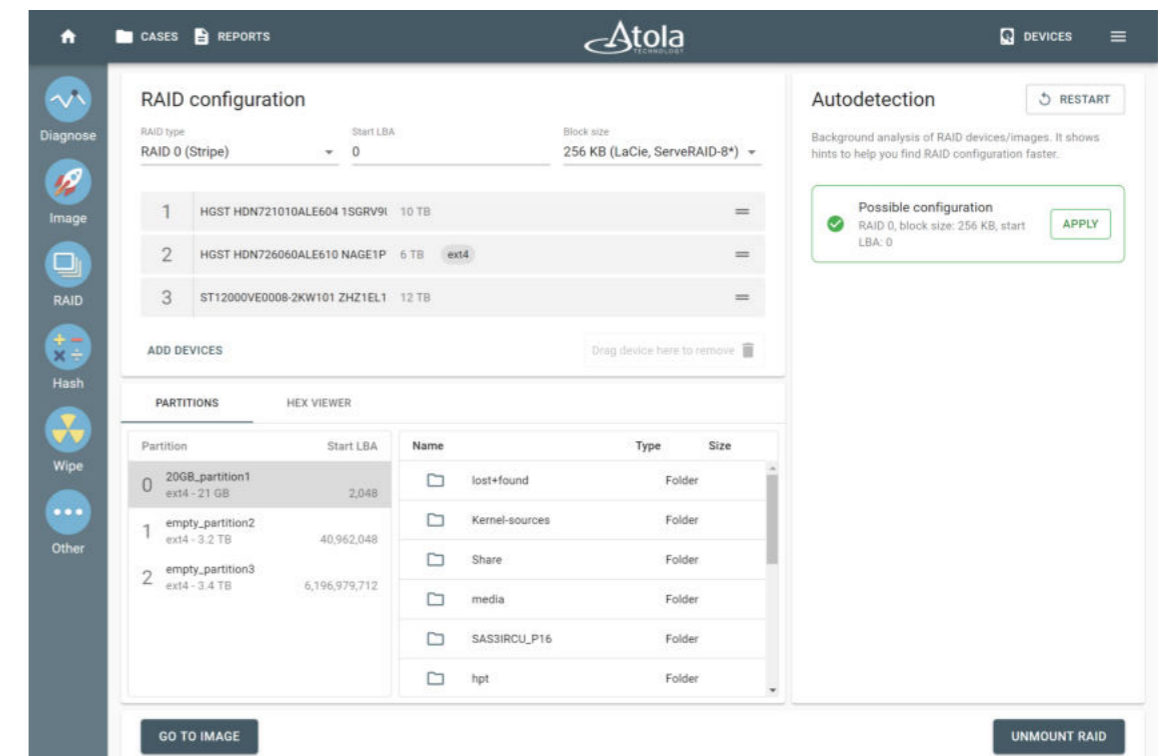

RAID configuration autodetection and imaging

- RAID identification by data parsing on connected drives and/or image files
- RAID types: RAID 0, 1, 5, 10 and JBOD
- File systems: NTFS, ext4/3/2, XFS, exFAT, HFS/HFS+, FAT32/16
- Instant identification of mdadm-created RAID
- One-click application of a suggested configuration
- Partition preview
- Rebuild of RAID with a missing or damaged device (for certain types of redundancy-enabled RAID)
- Max number of auto-checked RAID configurations: 100,000,000

Functions

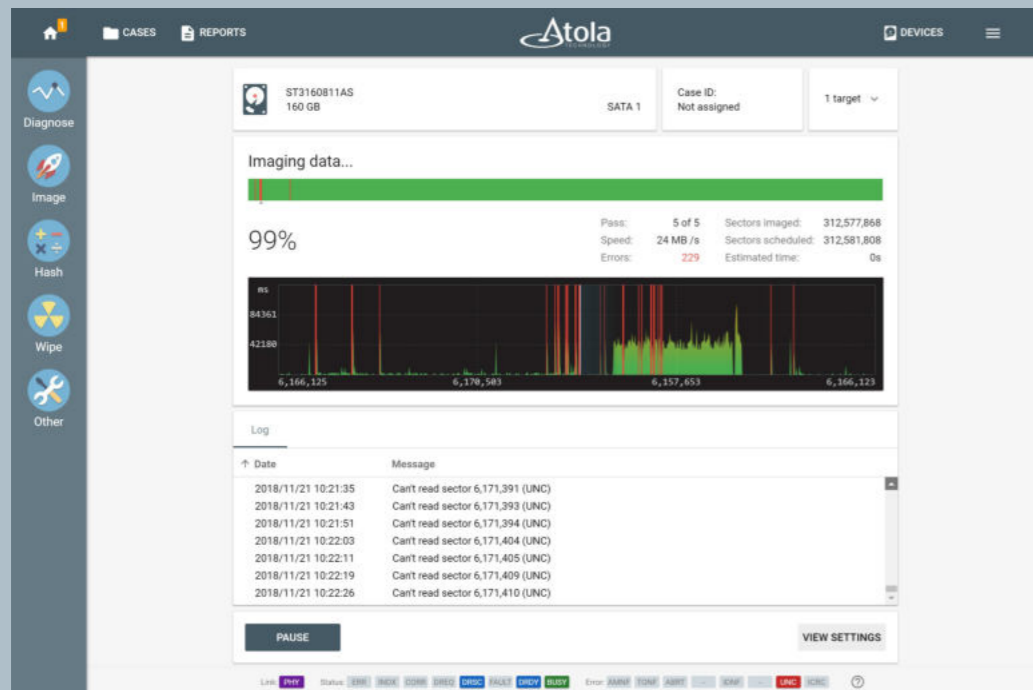

Forensic Imaging

- 15 TB/h cumulative speed of imaging
- 12+ simultaneous imaging sessions
- Imaging to up to 5 targets
- Automation via Web API
- Physical imaging to E01, AFF4 and RAW files
- Logical imaging to L01 file
- Source/target switch on all ports
- Hardware write protection in Source mode on all ports

Damaged drive support

- Imaging data from good heads only
- Imaging freezing drives
- Imaging drives with surface scratches and firmware issues
- In-depth drive diagnostics
- Pause/resume an imaging sessions, optimizing the settings to retrieve more data
- Current sensor on all SATA, SAS/SATA, IDE ports
- Automatic overcurrent and short-circuit protection

Two ways to manage TaskForce

10Gb Ethernet network

Standalone mode

Supported Drives

- 1.8-inch, 2.5-inch, 3.5-inch IDE
- SATA, SAS
- USB hard drives
- USB Flash media

(Optional) With extension modules:

- M.2 NVMe/PCIe/SATA SSDs
- Latest Apple SSDs via Thunderbolt extension
- The newest PCIe SSDs from Apple MacBooks (2013 - 2015)

Other features of TaskForce forensic imager

- Wiping with various methods: Pattern, Secure Erase, NIST 800-88, DoD 5220.22-M, Random, LBA number
- Browse files on any connected device
- SMART viewing + recording it before and after image acquisitions
- Hash calculation (linear and segmented): MD5, SHA1, SHA256, SHA512
- HPA & DCO control and recovery
- Automatic report generation
- Case management system

* For further information, please visit <https://www.atola.com/products/taskforce/>

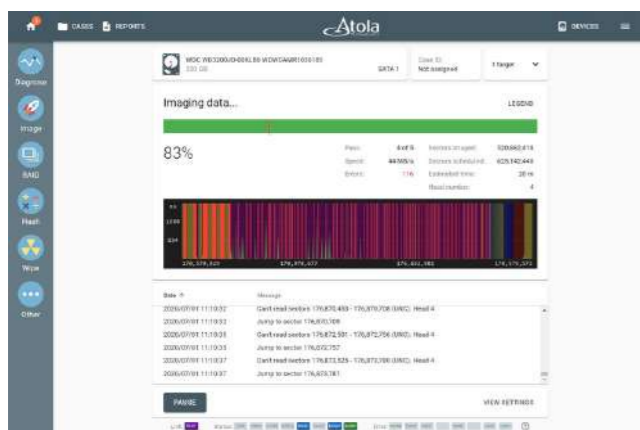

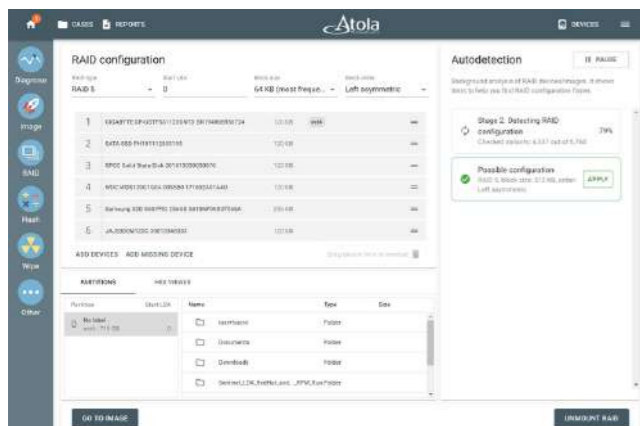

Atola TaskForce 2

Atola TaskForce 2 is a top-performance forensic imager capable of running **25+ imaging sessions** in parallel, automatically retrieve data from damaged media, detect and reassemble unknown RAID arrays.

TaskForce 2 has **26 ports**: 8 SATA, 8 SAS/SATA, 4 NVMe (M.2 and U.2), 4 USB, IDE and extensions for Thunderbolt and Apple PCIe SSDs. Two 10Gb Ethernet ports are available for fast data transfer. Device racks for convenient and secure drive organization.

TaskForce 2 can be connected to a network and operated by multiple users in Google Chrome browser on their own devices. An offline Kiosk mode use is available, too.

Imaging 25+ drives simultaneously at 25 TB/hour

Atola TaskForce 2 lets you multi-task using the fastest imaging engine thanks to its server-grade motherboard, 16-thread Xeon CPU 3.7 GHz and ECC RAM

- 25+ imaging sessions in parallel plus other tasks
- **25 TB/hour** cumulative speed of imaging
- imaging at 500+ MB/sec on SSDs, 4 GB/sec on NVMe
- Source/target switch on all ports for maximum flexibility
- Hardware write protection in Source mode on all ports
- Integration with **workflow automation** tools via Web API
- Pause and resume any imaging session
- Imaging to up to 5 targets including E01, RAW, AFF4 files in the networks, on other drives, VeraCrypt-protected drives
- Express mode (configure, activate and connect drives to have them imaged without further clicks into the selected destination)
- Powerful **logical imaging** module with smart filters for files and folders, time and size ranges to save time and target space

RAID autodetection, reassembly and imaging

- Autodetection for RAID arrays with an unknown configuration:
- identifies RAID type by reading data on selected members
 - processes thousands of potential configuration variants
 - one-click application of a suggested configuration
 - partition preview for visual assessment of a reassembled RAID
 - rebuild of RAID even with a missing or damaged device (for redundancy-based RAID)
 - physical or logical imaging of a complete RAID or its elements
 - Currently supported: RAID 0, 1, 5, 10, JBOD

Damaged drive support

Atola's data recovery engine is fully automated and is designed to retrieve maximum data fast and avoid further damage.

- In-depth drive diagnostics
- Automated data recovery with a multi-pass algorithm
- Selective head imaging
- Automatic reset of freezing drives
- Current sensors on all SATA, SAS/SATA, IDE ports
- Overcurrent and short-circuit protection on all ports
- Segmented hashing for damaged drive image verification

Atola TaskForce 2

Connectivity options

1. 10Gb Ethernet network
Open TaskForce interface on any device within the same local network by entering the IP address displayed on the front panel in Google Chrome. The system has two 10Gb ports.
2. Kiosk mode
For offline use, plug in a monitor, a keyboard and a mouse to the system. The interface will be immediately available.
3. Wi-Fi connection
TaskForce has an optional Wi-Fi adapter, by plugging which you can operate the unit in a secure network via a laptop, tablet or smartphone.

Multi-user access & user interface

The interface is designed for examiners with all levels of technical proficiency:

- Operated via Chrome browser
- Simultaneous use by multiple operators
- User management system limiting access to others' cases
- Launch of any operation within 2 - 5 clicks
- Highly intuitive task-oriented user interface

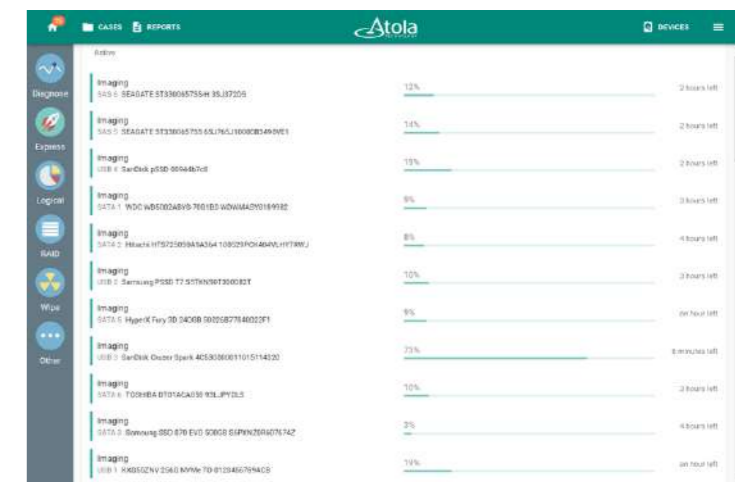

Other features

- **Drive content triage** via Browse file feature and in the Logical imaging module
- Wiping on all ports (26 devices in parallel)
- HPA, DCO & AMA control and recovery
- Hash calculation: MD5, SHA1, SHA256, SHA512
- Wiping (SecureErase, NIST800-88, DoD 5220.22-M, etc.)
- Case management system and automated reports
- S.M.A.R.T. view
- Supported file systems NTFS, ext4/3/2, XFS, APFS (with encrypted volumes), exFAT, HFS/HFS+, FAT32/16
- **Device racks** for convenient and secure drive organization
- Server rack compatibility

Lifetime warranty

Atola stands behind its products. We offer the best warranty in the industry. Keep annual subscriptions active for:

- 2-3 software updates
- training and knowledge refresh sessions for the users
- lifetime warranty on hardware
- support from the team of developers

711 MagicBox

Extract BitLocker recovery key without disassembly.

Forensically-Sound Solution

Non-Disassembly

Non Brute-Force

Internet-Free

Suitable for On-Scene

Portable Hardwares

High Compatibility

Compatible to Various Window PC

Easy to Use

Pre-Scan Function

One-Click Extraction

Quick Extraction

Forensically-Sound Solution

- No Disassembly Required**
Extracts recovery key without opening
- Offline Operation**
No internet connection needed; fully DFL-compliant
- Non-Brute-Force Method:**
Saves significant time and resources
- Forensically Sound:**
Leaves storage data untouched and intact
- Plaintext Key Extraction:**
Recovers the full recovery key in readable

Pre-Scan Phrase

Pre-Scan Devices

1. Insert the "711 Pre-Scan USB Drive" into the target PC.
2. Boot the PC from the USB drive (external boot).
3. Run the diagnostic program from the USB.
4. Verify compatibility:
The program displays whether "711 MagicBox" is supported on the PC.

Retrieval Phrase

Extract Devices

1. Connect the "711 MagicBox" to the target PC by LAN cable.
2. Boot the PC from the "711 MagicBox" (external boot).
3. Click "One-Click Extraction" in the "711 MagicBox" interface.
4. Key is shown in the PC screen.

Extraction Procedure

Compatible PCs

- Most PCs
- Windows 10/11 systems
- Protected with TPM + BitLocker

* This product is intended solely for use by law enforcement agencies.

RECON

ITR

SUMURI

A complete rebuild for modern Mac forensics

RECON ITR v26.0 has been rebuilt from the ground up in native Swift, designed specifically for macOS using Apple frameworks. This is not an update—it is a new application built to acquire and triage modern Mac systems with accuracy and reliability.

RECON ITR supports Apple Silicon systems including M1 through M5, as well as the latest MacBook Neo (A18), along with Intel and T2-based Macs. Built to work with macOS—not against it—it preserves critical Apple-native data structures and metadata during acquisition.

Key Capabilities

- Native macOS architecture using Apple frameworks
- Acquisition and triage of live systems and Target Disk Mode devices
- Support for Apple Silicon, Intel, and T2 Macs
- Integrated search, timeline, and reporting
- Preservation of Apple Extended Metadata
- Flexible imaging options through **RECON ITR** and included **PALADIN PRO**
- Integrated search, timeline, and reporting

Triage and Analysis

RECON ITR includes 101 macOS triage plugins designed to extract and parse key artifacts, along with 456 iOS artifacts via iLEAPP integration. Results are returned as structured, actionable data—not raw files—allowing examiners to quickly identify relevant evidence.

Reporting

Global Search, Global Timeline, and Global Report enable examiners to locate artifacts, build timelines, and generate clear reports directly on-site.

Open and Verifiable

All images are created using Apple-native or open formats and can be independently verified using standard tools. No proprietary lock-in. Evidence remains accessible and defensible.

RECON

ITR

Flexible Imaging Options

RECON ITR, together with the included **PALADIN PRO**, provides support for Apple-native and industry-standard imaging formats, including DMG, SparselImage, ASIF, E01/EX01, DD, and logical acquisition formats—giving examiners the flexibility to choose the right approach for each case.

Flexible Imaging Options

Built natively on macOS, **RECON ITR** correctly captures:

- Apple Extended Attributes
- Spotlight metadata
- Resource forks
- File system structure

Time Machine Local Snapshots

Access and triage Time Machine local snapshots to analyze point-in-time system states maintained by macOS.

Volatile Data Collection

Capture system state, running processes, network connections, and other volatile artifacts through structured triage plugins.

BootCamp and iOS Support

Triage BootCamp partitions and iOS backups alongside macOS data for a more complete investigation.

Independent Validation

Images can be verified using standard tools on any Mac system, supporting defensible forensic workflows.

Included: **PALADIN PRO**

Every **RECON ITR** license includes **PALADIN PRO**, a bootable forensic environment for imaging and triage across Windows, Linux, servers, and RAID systems.

PALADIN PRO provides:

- Physical and logical imaging
- Built-in write protection
- BitLocker decryption support
- Network-based imaging (SMB/NFS)
- Integrated open-source forensic tools

This extends **RECON ITR** beyond macOS, allowing examiners to handle multiple platforms using a single solution.

ABOUT SUMURI

SUMURI is a leading worldwide provider of solutions for digital evidence and computer forensic Training, Hardware, Software, and Services. **SUMURI** is also the developer of the industry standard **PALADIN** Forensic Suite, **RECON ITR**, **RECON LAB**, and **TALINO** Forensic Workstations.

**Modern Forensic Analysis
built for macOS**

RECON LAB is a forensic analysis platform designed to process and examine digital evidence across multiple operating systems using native macOS architecture.

Three-Stage Analysis Workflow

- 1.) Automated Analysis
Processes artifacts from macOS, Windows, iOS, Android, and cloud sources.
- 2.) Assisted Analysis
Provides tools for examining SQLite databases, plists, registry data, and raw files.
- 3.) Reporting
Generates structured reports using timeline-based and storyboard-style outputs.

-  Native to macOS
-  Automated artifact parsing
-  Timeline analysis
-  Structured reporting
-  Multi-platform support

RECON LAB is designed to help both new and experienced examiners move from data collection to actionable findings efficiently.

Native macOS Processing

Ensures accurate handling of Apple timestamps, metadata, and file structures.

Automated Artifact Processing

Parses thousands of artifacts across supported platforms with minimal manual effort.

Advanced Data Review

- Includes viewers for:
- SQLite databases
 - Property lists
 - Windows Registry
 - Raw data

Timeline and Reporting

Sequential processing enables clear timeline reconstruction and consistent reporting.

binary data

CSI RESPONDER

CSI Responder utilizes customized hardware and software to initiate target devices in compliance with legality, bypass system or disk encryption, and create high-speed disk images of the target device content using built-in imaging tools, in conjunction with CSI Responder's high-speed data interface and high-quality storage. Additionally, the customized Windows system includes various common device drivers and computer forensic analysis software, operating system emulation software. Users can also install various forensic software as needed for rapid analysis of the target device.

CSI Responder primarily addresses the following pain points:

- The increasing prevalence of non-removable storage in laptops / tablets
- Growing use of built-in encryption chips (TPM/T2/Apple Silicon) for disk encryption
- Increasing capacity of hard drives and the limited time available on-site investigation

Hardware

- Storage Interfaces** Dual-channel interface compatible with the latest Thunderbolt 3/4, USB4, featuring built-in 2TB*2 high-performance NVMe SSD
- Bootable Drive** The Windows forensic disk includes WinToGo, X64FE, X86FE, ARM64FE. (Default source write blocker) The Mac forensic disk includes MacOS 15.6 boot system and X-ImagerMac imaging tool
- External Hub** USB 3.2 Gen2 x2 (Type-A, 10Gbps), USB 3.2 Gen2 x1 (Type-A, 10Gbps), 100W PDx1 and other.

Build-in Software

- CSI Imager** : Self developed high-speed imaging tool with support for creating full disk decryption images
- X-Imager**: Self developed imaging tool for Apple computers, supporting the acquisition of Sparseimage or DMG images from T2 or Apple Silicon Apple computers.
- WinToGo**: The forensic system supports built-in third-party imaging tools or forensic analysis software.

CSI RESPONDER

Key Features

1 Non-dismantling Imaging

CSI Responder supports imaging hard drives of laptops, Windows tablets, and desktop computers without dismantling.

1. Compatible with over 95% of laptops, desktop computers, and Apple computers in the market with both Intel and ARM architectures.
2. Built-in disk offline write protection function in the forensic system, enabling non-dismantling read-only acquisition of the source disk image.
3. Multi-channel parallel imaging cache, tested with Thunderbolt 3/4, USB4 interfaces achieving speeds of up to 120GB/min with dual-channel access, and speeds exceeding 60GB/min for single-channel access.
4. Supports non-dismantling forensics of the latest ARM architecture tablets, such as Surface Pro X, Huawei

2 Disk Decryption

TPM (Trusted Platform Module)

MAC - T2 & Apple Silicon (M1/M2/M3)

3 Unbreakable Fast

Protocol	Thunderbolt + USB quad channel
Imaging Speed	120-150GB / min

Device Specifications

Dimensions: 120mm*100mm*20mm (Length x Width x Height)

Storage Channel Interfaces: Thunderbolt 3 x 2, USB-C x 2

External Interfaces: USB-A (3.1 Gen2, 10Gbps) x 2

Power Input: 12V (18W), supports power supply from power banks and charging adapters

4 Operations without 220V power supply

Our main unit supports powering devices via portable power banks, enabling on-site forensic work even without utility power.

RELIABLE END-TO-END SOLUTION TO ACCELERATE DIGITAL FORENSICS AND INCIDENT RESPONSE INVESTIGATIONS

Belkasoft N
Incident investigations

Belkasoft Incident Investigations (Belkasoft N) is a tool for digital incident investigations and is aimed to incident response professionals, working in a corporate environment. The product helps to identify traces left over from malware and hacking attempts on a Windows computer.

<https://belkasoft.com/get>

KEY FEATURES

- Detect suspicious traces in most typical locations, including registries, event logs and less known files
- Analyze how malicious code persisted in the system by analyzing services, scheduled tasks, WMI subscriptions, Applinit DLLs and so on
- Learn how and when malware was executed by examining various artifacts such as Amcache and Shimcache, Syscache, BAM and DAM
- Extract remote connections details including IP and time stamps for RDP and TeamViewer
- Find potential initial attack vector by analyzing recently opened documents and browser links, latest downloads and so on
- Search inside extracted information, bookmark important data and create reports in multiple formats

WHY SHOULD YOU CONSIDER BELKASOFT N?

Quick

Quickly respond to hacker attacks thanks to all necessary data conveniently presented on a single screen.

Comprehensive analysis

Detect impactful security events by analyzing numerous sources, such as registry, event logs, other system files and less known sources.

Search, bookmarking and reporting

Search inside found artifacts, bookmark important data and generate comprehensive incident reports right after the analysis stage.

Compatibility with other tools

Benefit from the analysis functionality of images acquired by Belkasoft X, Belkasoft R, and Belkasoft T as well as by the third-party tools.

Affordable

Comparing to the pricing of the alternative products, it will fit your budget easily.

USE CASES

Endpoint attacks

Malicious email activity

Anomalous user activity

Remote access attacks

Attacks correlation with known vulnerabilities

ELCOMSOFT
DESKTOP, MOBILE & CLOUD FORENSICS

Elcomsoft Premium Forensic Bundle

Every tool we make in a deeply discounted value pack. Extract data from mobile devices, unlock documents, decrypt archives, break into encrypted containers, view and analyze evidence with all-in-one Premium Forensic Bundle.

DIGITAL FORENSICS USING PREMIUM TOOLS

Support for more than 500 types of data

Our tools support 500+ application versions and file formats allowing users to recover passwords to Microsoft Office and OpenDocument files, Adobe PDF files, PGP disks and archives, Windows and email accounts, MD5 hashes and Oracle passwords, and remove many more types of password protection ([list of supported formats](#)).

Accessing data instantly

In many cases, Elcomsoft Premium Forensic Bundle is capable of instantly recovering passwords for a wide range of applications. Our tools exploit every known vulnerability to unlock documents instantly or near instantly, while employing smart attacks and high-end hardware acceleration techniques to quickly recover strong passwords.

Targeting the human factor

Our products offer a range of highly intelligent attacks based on the knowledge of human nature. By targeting the human factor, our smart attacks significantly reduce the number of passwords to try and increase the chance of successful recovery.

Support for popular password managers

Support for some of the most popular password managers including 1Password, KeePass, LastPass and Dashlane. Attacking and recovering a single master password provides access to dozens of passwords to a wide range of resources that are kept in the encrypted database.

25 to 250 times faster attacks with hardware acceleration

Our tools utilize dedicated high-performance cores found in video cards manufactured by NVIDIA and AMD, as well as GPU cores built into Intel CPUs including Intel HD Graphics, UHD Graphics and Intel Iris. Our thoroughly optimized algorithms enable reaching recovery rates that are up to 250 times faster compared to CPU-only benchmarks ([CPU vs GPU benchmarks](#)).

Linear scalability on up to 10,000 computers

Our tools enable massively parallel operations and scale linearly to as many as 10,000 workstations and cloud instances with no scalability overhead. Distributed attacks scale over the LAN, Internet, or both. Minimum bandwidth requirements ensure no scalability overhead even for the slowest connections.

Dictionary attack

Using the prepared dictionaries based on leaked password databases or building own password dictionaries based on instantly recovered passwords. Automatic distribution of custom dictionaries across running agents.

Cloud computing

Quickly add computing power on demand by utilizing Amazon's GPU-accelerated EC2 Compute Units or Microsoft Azure instances. Password recovery running in an Amazon or Microsoft cloud is a perfect solution when additional computational power is needed.

Comprehensive Mobile Forensic Solution

The Elcomsoft Mobile Forensic Bundle includes the most essential tools for safe and forensically sound acquisition, decryption and analysis of evidence from a wide range of mobile platforms and cloud services.

Forensic analysis of Apple devices

The newest jailbreak-free low-level access to data offers direct, safe and forensically sound extraction for Apple devices running all versions of iOS from iOS 11 through iOS 13. This new agent-based acquisition provides full file system extraction and keychain decryption without a jailbreak and literally no footprint. The complete forensic acquisition using jailbreak is also available.

Obtain iCloud backups, download photos and synced data, access iCloud passwords

Try the most comprehensive iCloud data acquisition on the market enabling forensic access to evidence stored in the cloud with and without the Apple ID password. Access cloud backups, call logs, messages, passwords (iCloud Keychain), contacts, iCloud Photo Library, iCloud files, Apple Health and Screen time, geolocation data and a lot more.

Break passwords to iOS system backups

Brute-force passwords protecting encrypted iOS backups with a high-end tool. GPU acceleration using AMD or NVIDIA boards helps achieve unprecedented performance, while access to users' stored passwords enables targeted attacks with custom dictionaries.

Full over-the-air acquisition of Google Accounts

Google collects massive amounts of information from registered customers. The Premium bundle includes the powerful and lightweight forensic tool to extract information from the many available sources, parse and assemble the data to present information in human-readable form. Extract and analyze user's detailed location history, search queries, Chrome passwords and browsing history, Gmail messages, contacts, photos, and a lot more.

Support for popular instant messengers: WhatsApp, Skype, Signal etc.

Extract, decrypt and view WhatsApp, Skype, Signal and Telegram communication histories from a wide range of devices or cloud services. Instantly retrieve the login and password information protecting user accounts in more than 70 instant messengers for desktop.

YOUR BENEFITS

All in one

A single purchase delivers all ElcomSoft products in their respective top-of-the-line editions that allow recovering passwords and decrypting encrypted data.

Research and development

The password recovery suite features the latest and most advanced cryptanalysis algorithms developed by ElcomSoft research department. We continue to deliver cutting-edge technologies in password recovery and data decryption.

Industry-certified technologies

Elcomsoft is Microsoft Silver Certified Partner, Intel Software Partner and member of NVIDIA CUDA/GPU Computing Registered Developer Program.

Patented technologies

ElcomSoft pioneered many software innovations that have made it easier to access protected data. The GPU acceleration, which is patented (U.S. Pat. No. 7,787,629 and 7,929,707) and unique to ElcomSoft products, making password recovery up to 250 times faster compared to traditional methods, is just one of the innovations.

Education and consulting

We offer comprehensive three-to-five-day courses offering hands-on experience in unlocking and extracting evidence from mobile devices, accessing password-protected and encrypted computer data.

Chip-off Data Recovery & Digital Forensic analysis of broken flash storage devices.

Application

	Firmware X
Physical Damage	Firmware Failure
	
Electrical Damage	Thermal Damage
	Recognize X
Analysis "non-addressed areas"	Non-recognizable disk

Workflow

-  Put the chip into the adapter
-  Connect the adapter to the reader and press "Read memory chips."
-  Binary dump file of physical image is produced
-  Rearrange the physical NAND blocks into the logical block by using VNR software
-  Full file-system structure is shown

Features

- Data recovery from broken Flash devices
- Forensic analysis of NAND physical image
- Analysis of hidden/obsolete/bad blocks of NAND memory
- Automatic analysis modes
- Largest set of adapters on market
- Powerful manual analysis and reverse engineering modes
- Unique dump viewer modes
- Support of microSD and other monolithic devices
- Flexible software conception and intuitive GUI with database
- Power adjustment for weak and mobile chips (1.8V...4.0V) separately for core and IO bus

Options

Starter Kit	Standard Kit	EMMC Adapter Kit	Monolithic NAND Adapters
 TSOP48  BGA100  LGA52  BGA152/13  MONOLITH	 BGA152  BGA100  BGA132  BGA107  BGA137  TSOP48 WIDE  LGA60 (FOR TH58TF11DFKLAHVH AND ALIKE)	 BGA162 EMMC  BGA169 EMMC 10x11  BGA169 EMMC 11.5x13  BGA169 EMMC 12x16  BGA169 EMMC 12x18  BGA169 EMMC 14x18  BGA186 EMMC  BGA221 EMMC	 MICROSD 3x7 PADS  SANDISK MONOSD  SANDISK MONOUFD  MONOUFD 6x6 & 3x7 PADS  MONOSD 4x10 PADS  MONOSD 3x13 PADS  SAMSUNG MICROSD  MICROSD 6x4 PADS  BGA316 & BGA272

Forensics Acquisition of Web Sites

Take authentic **online** content to **civil** and **criminal** court.

What is FAW?

All data acquired using FAW have legal value and can be used in court.

FAW is a software that includes a set of tools to capture any type of web page: static and dynamic, CMS, Mobile, E-Commerce, Social Network, Dark Web, Intranet, etc.

FAW makes the process of collecting content easy by doing it for you. The entire acquisition process is fully automated by the software to avoid the risk of human error typical of manual procedures, guaranteeing the undeniable validity of the collected data.

FAW is the first forensic browser, the best known in the world and the only one that guarantees the authenticity, compliance and unalterability of the web pages it captures.

Characteristics of FAW

EASY TO USE

It works like a browser. Everyone, even users without any IT knowledge can collect digital evidence independently.

SECURE STORAGE

All files are stored on your computer and can be accessed offline whenever you wish. Integrity is guaranteed.

CERTAIN DATE

Each document you download has a certain and certified date. This guarantees their authenticity and integrity over time.

TRAINING AND SUPPORT

Provide training resources and technical support for investigators on the effective use of the digital forensics application.

LEGAL VALIDITY

Recognized by the computer forensics community. All documents downloaded using FAW are legally valid.

UNLIMITED ACQUISITION

You can repeat the acquisitions as many times as you wish. Once the license is purchased, there are no usage limits of any kind.

USED BY LAW ENFORCEMENT

Trusted by the majority of law enforcement agencies in the world, the version is designed to store data on the servers.

FORENSICS REPORT GENERATION

Generate detailed and customizable forensic reports that document the evidence collected and analyses performed.

What can you capture?

Why choose FAW?

We are the first and only forensics browser since 2011 and supported by an extensive worldwide reseller network offering technical support to users.

It's easy to use and without the possibility of making mistakes and also, the most complete forensics capture software on the web with automated forms for the most important social networks. It was created and developed by independent and established companies (not start-ups) and it is supported by an extensive worldwide reseller network offering technical support to users.

FAW is the most ethical, suited to the needs of students, professors, and associations with free licenses to spread knowledge of the digital forensics best practices and it is available in many languages and tested by the world's leading forensics communities.

Acquisition modes

FAW offers a wide range of capture modes. All its features have been developed in accordance with national and international legislation, scientific articles and best practice in digital forensics.

FACEBOOK

Grabs Facebook URLs with extensive configuration on the types of pages and items to grab.

YOUTUBE

Capture YouTube pages, download and certify the videos present and all the linked items.

STOP

It allows you to capture the overall behavior of pages and multimedia content over time and keeping the recording of the screencast.

MAIL

The module allows you to connect to mail servers and to download and certify all the emails in your mailbox.

MULTI

FAW in multi-page version, allows the automatic capture of a list of web pages. Perfect for capturing entire websites.

REPORT

With this tool you can create a detailed report of all the activities carried out with the FAW suite.

TORRENT

Captures through the most popular p2p protocols all streams from both files and servers through URLs.

WHATSAPP

With this tool you can capture entire Whatsapp chats. Download and capture any item present in the chats.

TOR

Capture web pages on the Darkweb through the TOR network. Carefully evaluate the risks and act responsibly.

BOT

It is a crawler aimed at finding all the pages linked to the main page. Allows you to search sites with login-protected areas.

FTP

This tool allows you to capture entire websites in FTP and SFTP mode without changing metadata of copied files.

Compliance

The "FAW – Forensics Acquisition of Web sites" software was developed and is kept updated following the regulatory indications of international standards on the subject of computer data acquisition, it also complies with the other standards, in terms of Network Forensics and Cloud Forensics, established and recognized by the technical-scientific community at national and international level.

FAW is compliant with the International Organization for Standardization, ISO/IEC 27037/2012: Information technology – Security techniques – Guidelines for identification, collection, acquisition and preservation of digital evidence

Our licenses

The ideal solution to make all the acquisitions you want within 24 hours, at an extremely affordable price.

It is ideal for those who need to have all the advanced features of the product to acquire any type of web page with legal value.

Suitable for technical consultants and professionals who need automated acquisitions.

The most comprehensive forensic web page capture software.

Suitable for technical consultants and professionals who need automated acquisitions, TOR network and advanced tools to speed up the acquisitions optimizing time and resources.

Verify that you can correctly acquire the web pages you are interested in.

Forensic web page capture software designed for the Law Enforcement.

All the features of the Professional version with more functionalities required by operators of the sector.

Each license has an annual duration and is combined with a workstation.

Can only be purchased by law enforcement and government agencies.

Involve Forensics LTD - 41 DEVONSHIRE STREET, GROUND FLOOR
LONDON W1G 7AJ - COMPANY NUMBER 12690094

FAW - Forensics Acquisition of Websites

Mobile Forensic

MD-NEXT

MD-NEXT is a forensic software for data extraction from diverse mobile and digital devices. It supports physical and logical extraction methods across various operating systems.

Device & OS Support

15,000+ Models Supported

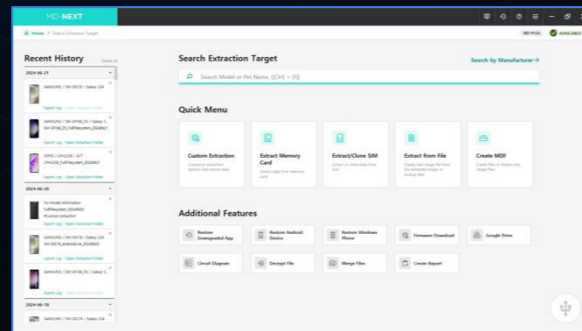

- Supports smartphones, feature phones, tablets, IoT devices, smart devices, wearables and embedded industrial PC board

Universal Chipset Compatibility

- Extraction support for devices with all major chipsets, such as Qualcomm, MediaTek, Samsung Exynos, Apple and UNISOC

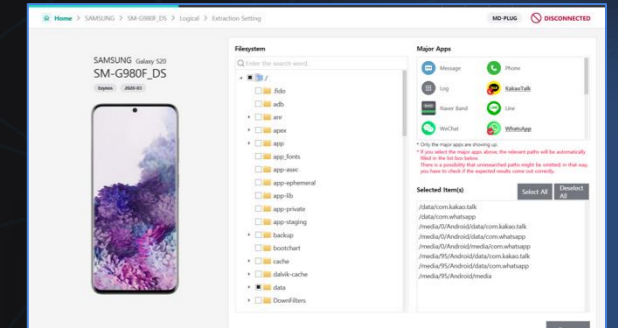

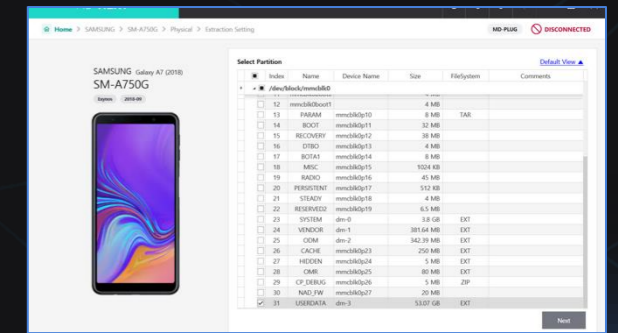

Diverse mobile OS supported

- iOS, Android, Windows, Kai OS, Bada OS, Tizen OS

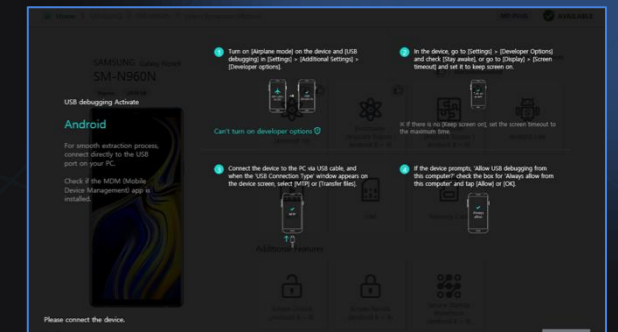

Extraction Utilities

- Provides utilities for resuming failed extractions and merging multiple image files
- Selective extraction by partition, by apps and by folders
- Features smart automation for custom extraction and automatic partition decryption
- Restores firmware and downgraded apps
- Support for clone of SIM cards
- Support for automatic analysis with MD-RED after extraction

Intuitive User Interface

- Offers an easy-to-use graphical UI with clear guides and automatic device detection
- Displays real-time progress, estimated time, and data size
- Includes a built-in Hex viewer for data preview

Powerful Extraction

Physical & Logical Extraction

- Employs various physical methods like Bootloader, ADB Pro, Custom Image, SD Card, USIM, JTAG, and Chip-off
- Unlocking of FDE enabled phones
- Brute-forcing of Secure Boot Startup
- Android/iOS FFS (Full Filesystem) extraction
- Android Logical Extraction – Android Live Pro (Keystore), Android Live (ADB Backup, Manufacturer backup, App backup, Extraction agent)
- iOS Logical Extraction – AFC, iOS backup
- MTP extraction, Tizen Live extraction

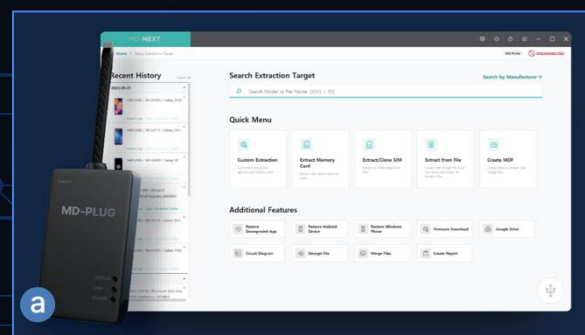

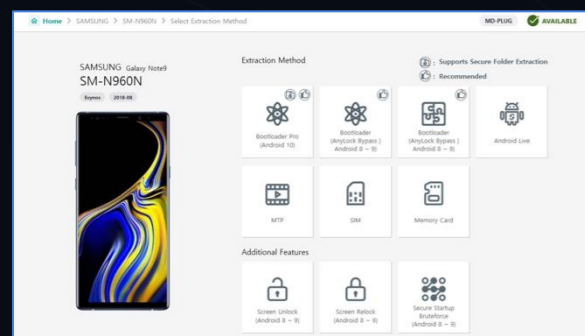

MD-PLUG : Advanced Extraction

- Hardware for secure data extraction including keystore
- Advanced FFS – MTK, Qualcomm, Exynos and UNISOC chipset devices of FBE enabled
- Android Live Pro – Keystore extraction

Saving & Reporting

- Supports for saving extraction images as .bin file compatible with other analysis tools
- Ensures data integrity with write-protection
- Generates comprehensive reports in PDF, Excel, Word and HTML formats
- Support for 10 different hash algorithms for extracted files
- Generates extraction log files

MD-PLUG hardware for advanced extraction

MD-RED

MD-RED is an AI-powered data analysis software for Recovery, Decryption, Visualization, Analytics, and Reporting of evidence data from mobile and digital devices

Apps and Data Analysis

Analysis of 2,500+ apps

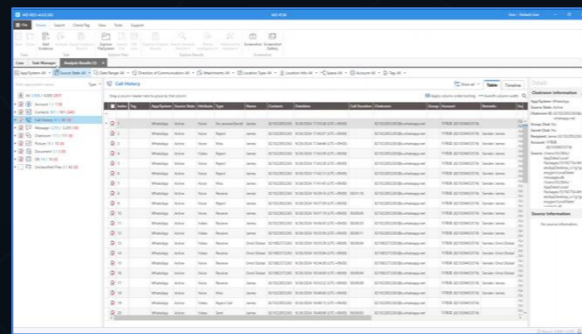

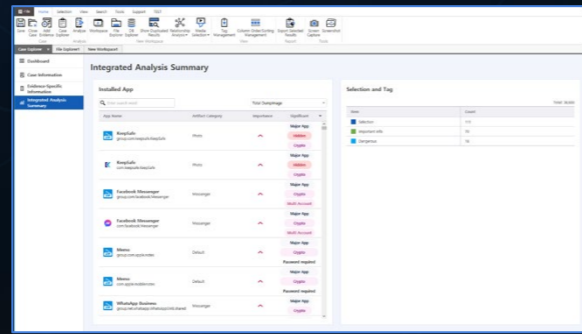

- Analysis of 2,500+ popular mobile apps
- Multi-Account & Space Analysis
- Decoding, Deserialization and Decryption of app data
- Anti-forensic Apps Detection

Malware Scanning

- Malware detection on APK by scan engine
- Malware detection on files by Yara rules (*.yar, *.Yara)

File System and Image Analysis

- Recovery of file system: EXT2/3/4, HFS+, APFS, NTFS, FAT12/16/32, exFAT, F2FS, VDFS, RSFS, XFS, and YAFFS
- Support for 3rd party forensic tools' images from Encase, GrayKey, UFED, PC-3000 Mobile PRO
- Recovers deleted files and data from unallocated space

Visualized Analysis Result

- Map view for GPS data and cell tower location
 - Offline/Online map (Region/Country/City)
 - Tracking based on time flow
- Gallery view of multimedia files
- Timeline view of analyzed data
- Link view for social relationship
- Chat view for communication
- Web browser for internet history review
- Hex data, PList, Documents, Video, Audio viewers
- DB Hub for database files table view

Reporting and Export

- Tagging, filtering, keyword and hash set search
- Supported reports: Excel, PDF, HTML, XML, SQLite DB
- Exports reports form for Relativity and Nuix
- Wizard for configuring report and exports
- MD-Explorer: Distributable viewer for review and tag

Multimedia Intelligence

AI-Powered Deep Analysis

- GPU acceleration for AI processing (Nvidia GPU support)
- AI inference engine of GMDSOFT proprietary

Image Analysis

- Facial Detection and Search
 - Detects faces in images to group by same face
 - Deep faked face detection
- Supports over 80 objects detection
 - Key objects: Car, Truck, Knife, Rifle, Pistol, Person, etc.
- Camera Analysis: Device type, photo information

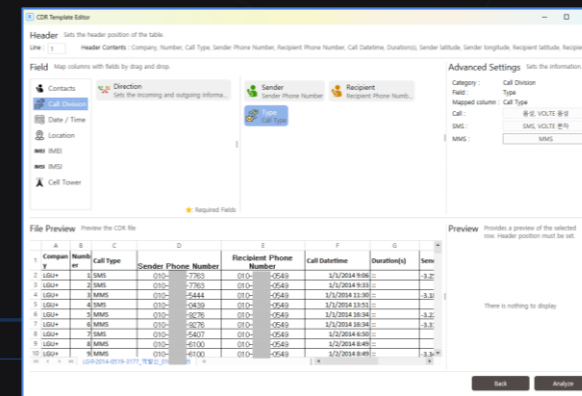

Language Analysis

- OCR results can be found in analysis result and media selection result
 - Supporting language: English, Korean
- Scanned images or taken pictures of documents are categorized as document images
- STT(Speech To Text): Converts recognized speech into text in the selected language
- MT(Machine Translation): Converts recognized speech into text in the selected language

CDR Analysis

- Call Detail Record Analysis
- Create a template for analyzing CDR file supplied by mobile carrier
- Relationship analysis together with mobile communication data

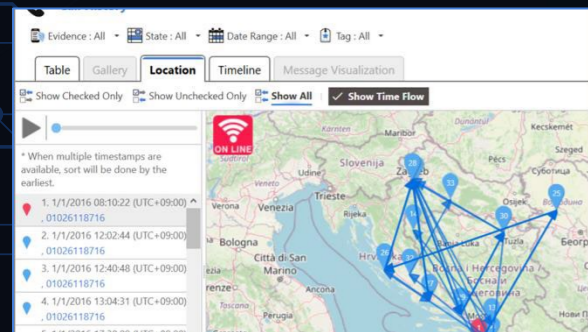

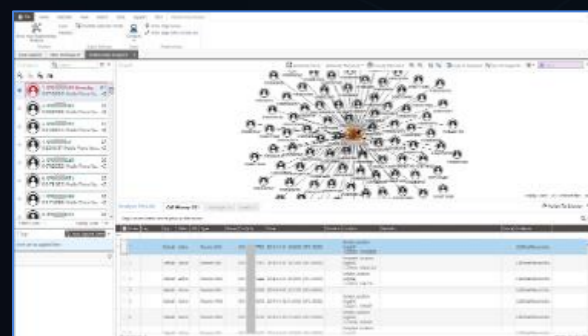

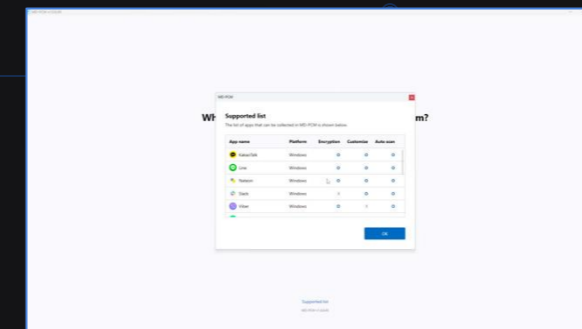

Project VIC (VICS, CAID)

- Filter images identical or similar to those of Child Sex Use Material (CSAM) registered with Project VIC
- A file having the same or similar hash value may be classified for multimedia based on VICS and CAID

PC Messenger Analysis

- WhatsApp, WeChat, Facebook, Zalo, Zoom, Telegram, Unigram, IMO, Wickr, Viber, LINE
- Add-on license for PCM analysis required

MD-LIVE

MD-LIVE is a forensic software designed for triage, specific evidence collection and rapid on-site investigations of mobile devices. It enables quick scanning, selective data extraction, real-time analysis, and secure evidence reporting.

Data Extraction

Selective Extraction

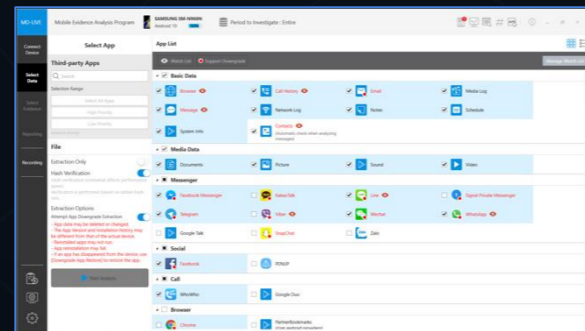

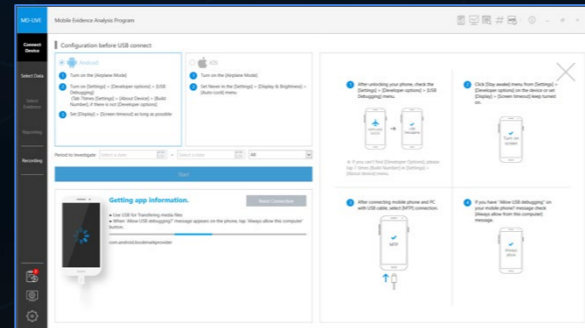

- Scanning & Recording investigation before extraction
- Period specification with detailed OS connection guides
- Selective extraction by file, category, and application
- Option mode: Extraction only mode, Hash verification
- Hash set search (Project VIC, CAID support)

Android Support

- ADB Backup
- Manufacturer backup (Smart Switch, HiSuite, Bridge)
- Extraction Agent app installation
- App Downgrade for 80+ applications

iOS Support

- iTunes backup with encrypted backup decryption
- Temporary backup password setting and removal

Recording Investigation

- MD-CAMERA: External camera for evidence/process recording
- Phone Screen Mirroring: Remote control, capture and recording without phone operation
- Program Screen Recording: Video/audio recording of MD-LIVE program screen to reproduce or verify its forensic process

* MD-CAMERA

* HDMI capture card

Chat Scanner

- Convert chat screenshots into chat text by OCR
- Import Screenshots from Auto Scroll Captured recording, screen recording or extracted pictures
- Correction of OCR results of words or symbols
- Messenger Applications: WhatsApp, Telegram, Facebook Messenger, Signal, Instagram DM, WeChat, Line, KakaoTalk

Reporting

- PDF Reports: Summary & detailed analysis with document editor
- Message Visualization: Timeline view with anonymization option
- Multiple Formats: Excel (.xlsx), Database (.sqlite), MDF
- Archive Creation: ZIP, TAR, DD formats
- Multimedia Export: Separate file extraction option

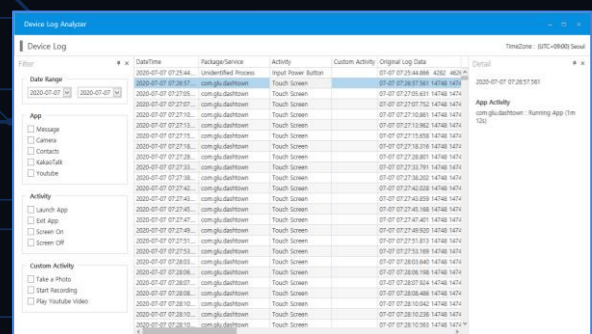

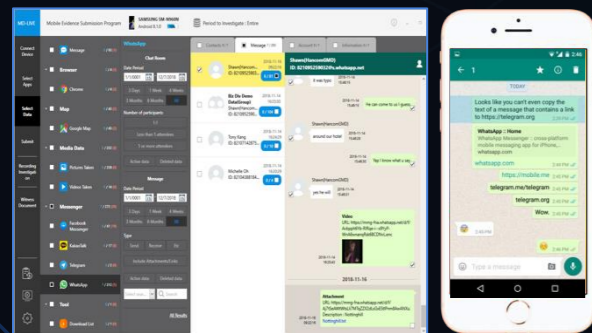

Data Analysis

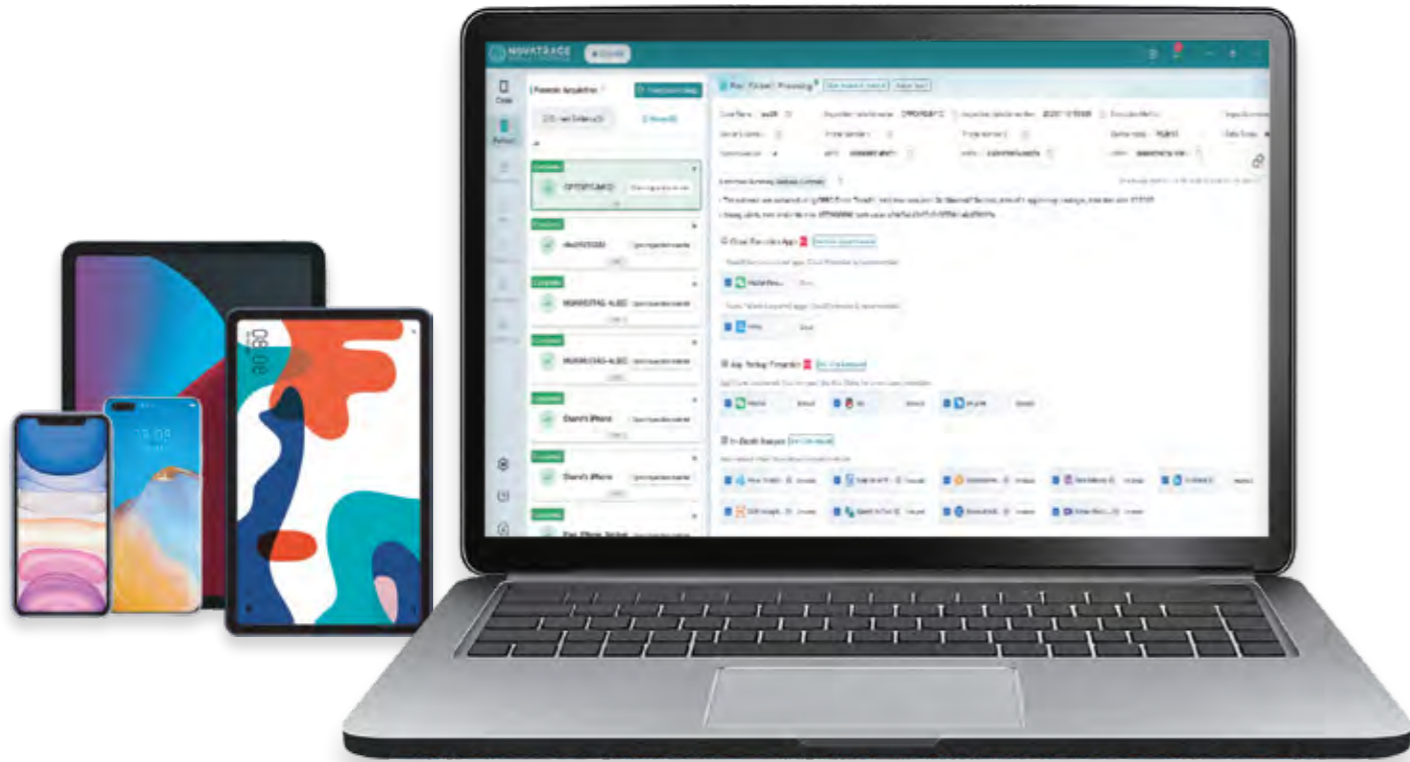

Analysis Capabilities

- 2500+ Android and iOS applications analysis
- Popular Messengers: WhatsApp, WeChat, Signal, Facebook Messenger, Discord
- Basic Data: Browser, Call History, Contacts, Map History, SMS/MMS
- Social Media: Facebook, X (Twitter), Instagram
- Multimedia: Documents, Pictures, Audio, Video
- Android Log Analysis: Recent usage tracking
- Process Monitoring: Active application analysis

Evidence Selection

- Category and application-specific filtering
- Watch list apps and data type
- Keyword search support (.xlsx, .csv, .txt, .keyword)
- Visualization with maps, chat display, gallery

NovaTrace

Parallel Mobile Forensics System

-  Data Extraction
-  Data Recovery
-  Data Analysis
-  Data Retrieval
-  Report Export

The NovaTrace Parallel Mobile Forensics System is a comprehensive, all-in-one forensic solution designed for the modern digital investigator. It combines unparalleled acquisition flexibility with powerful, AI-driven analysis tools to streamline workflows and uncover critical evidence efficiently.

01 MULTICHANNEL ACQUISITION VERSATILITY

Acquire data from virtually any source: multiple devices in parallel, all major OS (Android, iOS, HarmonyOS), vendor backups, PC clients via QR code, and isolated WiFi, without needing root or complex downgrades.

02 DEEP CHINESE ECOSYSTEM & CLOUD SUPPORT

Gain unmatched access to data from over 300 popular Chinese applications and critical cloud services like WeChat Pay, Alipay, and Baidu Netdisk, ensuring no key evidence is missed.

03 AI-POWERED EVIDENCE PROCESSING

Automate the discovery of critical evidence with AI-driven image analysis (faces, IDs, transactions) and speech-to-text conversion, transforming multimedia files into actionable intelligence.

04 TARGET-CENTRIC INVESTIGATIVE INTELLIGENCE

Focus your investigation efficiently. The "Target Person" feature automatically correlates identities across all data, while cross-device analysis and visual timelines reveal hidden connections and the full story.

05 COMPREHENSIVE FORENSIC WORKFLOW TOOLS

Manage the entire process within one platform, from static/dynamic APK analysis and custom scripting for new apps to built-in screen recording for impeccable audit trails.

06 PROFESSIONAL-GRADE REPORTING & COMPLIANCE

Customizable report templates, merge capabilities across cases, historical task management, built-in screen recording, and a portable report viewer with search and filtering. Supports forensic workflow standards, evidence tagging, audit logs, and isolated acquisition modes to maintain data integrity and chain of custody.

MOBILedit Forensic

All-in-one phone forensic tool
from pioneers in the field

MOBILedit Forensic is an all-in-one solution for data extraction from phones, smartwatches and clouds. It utilizes both physical and logical data acquisition, has excellent application analysis, deleted data recovery, a wide range of supported devices, fine-tuned reports, concurrent processing, and easy-to-use interface. With a brand new approach, MOBILedit Forensic is much stronger in security bypassing than ever before.

MOBILedit Forensic offers maximum functionality at a fraction of the price of other tools. It can be used as the only tool in a lab or as an enhancement to other tools with its data compatibility.

SECURITY BYPASSING WITH LIVE UPDATES

MOBILedit Forensic has built-in security bypassing for many phone models, allowing you to acquire a physical image even when the phone is protected by a password or pattern. Bypass the lock screen on a wide range of Android phones, so you can keep the investigation moving forward. We are introducing a new approach to security bypassing with Live Updates technology - new phone models can be added even without a MOBILedit reinstallation, just like updating antivirus software!

PHYSICAL DATA ACQUISITION AND ANALYSIS

In addition to advanced logical extraction, we also provide Android physical data acquisition, allowing you to extract physical images of investigated phones and create exact binary clones. Physical analysis allows you to open image files created by this process, or those obtained through JTAG, chip-off or other tools, to recover deleted files plus all other deleted data.

SMARTWATCH FORENSICS

With the rise in popularity of wearable devices, smartwatch forensics plays an essential role and is vital if a smartwatch is the only digital evidence available. MOBILedit Forensic supports smartwatches made by manufacturers such as Apple, Garmin, Samsung, TCL, Huawei, Amazfit and others, via special readers which are available in our Smartwatch Kit.

CLOUD FORENSICS

Besides phone content acquisition, cloud extraction is a necessity to get all possible data. MOBILedit Cloud Forensic supports the most popular cloud-based services such as Dropbox, Box, Microsoft OneDrive, Google Drive, Facebook, Instagram, LinkedIn, Twitter, Facebook Messenger, Slack and many others. This powerful feature is available as a standalone product or can be integrated within MOBILedit Forensic Pro.

DELETED DATA RECOVERY

Deleted data is almost always the most valuable information in a device. It often hides in applications, and we deliver great results in finding deleted data. Our special algorithms look deeply through databases, invalidated pages and within caches to find any data that still resides in a phone.

ADVANCED APPLICATION ANALYSIS WITH LIVE UPDATES

Applications are the most important source of evidence in the phone. The majority of phone activities, including messaging, phone calls, internet browsing and others take place within apps. This is the strongest point of MOBILedit Forensic, we dedicate a large part of our team specifically for application analysis. Data is analyzed for its meaning so you see it on a timeline as a note, a photo, a video or a flow of messages no matter what app was used to send them.

SMART SCREENSHOTS

The Smart Screenshots feature provides a solution for obtaining evidence from applications that cannot be accessed through logical extraction. This advanced feature enables the extraction of conversations and other information from popular messaging apps like Instagram, Signal, Skype, Telegram, Viber, and WhatsApp. The screenshotting is automatic without requiring any user interaction on the device.

CONCURRENT EXTRACTIONS

Speed up your investigation process by extracting multiple phones at the same time, and generating multiple outputs for each one. All you need is a USB hub, cables and a computer powerful enough to perform concurrent jobs. You can finish a week's worth of work overnight!

OBJECT AND FACE RECOGNITION - THE POWER OF ARTIFICIAL INTELLIGENCE

Use Artificial Intelligence to find the evidence and speed up your work. This state-of-the-art tool is equipped with the latest deep-learning technology and is designed to rapidly identify photos and videos of what an investigator is searching for. Simply specify a folder of photos and videos and choose items you are searching for, such as pistols, knives, narcotics, money, documents, people, and many others. With this tool, you can now also recognize faces in videos, allowing you to quickly and accurately identify individuals of interest. This advanced feature can help you solve cases more efficiently by automatically detecting and recognizing faces in surveillance footage or other video evidence.

CAMERA BALLISTICS - SCIENTIFIC IMAGE ANALYSIS

The scientific forensic tool that matches a photo to a camera, like a bullet to a gun. When combined with MOBILedit Forensic you are able to identify which images present on the analyzed phone were actually taken by the phone's camera.

DIVE COMPUTER FORENSICS

Delve into underwater data with MOBILedit dive computer forensic analysis. Uncover reasons behind incidents, protocol adherence, and vital dive details. Extract key metrics like water temperature, depth, dive duration, and gas tank readings from over 200 dive computer models, including major brands like Suunto, Oceanic, Cressi and more. Crucial functionality for regions with aquatic landscapes.

INTEGRATE WITH OTHER TOOLS

We all know that it is a good practice to use multiple tools in a lab. We've designed MOBILedit with the ability to integrate with other forensic tools. Import and analyze data files exported from Cellebrite UFED reports to get even more data. We also extract all data into open data format, so you get all the files directly as they are in the phone. This allows you to use many open-source tools.

MOBILedit Cloud Forensic

Get a complete digital footprint
of a suspect

People interact within today's digital universe through their phones and applications, leaving digital footprints everywhere. For a full and successful digital investigation, it is necessary to analyze all traces. Phone forensics is extremely important, but what is stored in a mobile device is only a snapshot of the overall data. The evidence found in clouds, message platforms, and social networks brings complete insight into a person's life. Understand their lifestyle, activities, personality, likes/dislikes, preferences, and social activities through services such as Facebook, Instagram, LinkedIn, Twitter, Slack, or Google apps.

With a successful phone examination provided by MOBILedit Forensic PRO, you have almost everything necessary for a successful cloud extraction. This is because phone applications hold precious login information for most cloud services.

Even without a phone, you can still access data from cloud services that are used by millions of people multiple times a day, every day.

MOBILedit Cloud Forensic is a complete cloud data forensic downloader and report generator for the most popular services. It can immediately start downloads when authentication information is found in a phone, and it can run multiple extractions concurrently when time is of the essence.

CLOUD FORENSICS IS AVAILABLE IN TWO OPTIONS TO CATER TO BOTH NETWORK FORENSIC INTERCEPTION AND MOBILE DEVICE EXAMINERS:

Integration with MOBILedit Forensic PRO

With this option, you can extract data from clouds via a mobile device connected to MOBILedit Forensic Pro. The credentials are extracted from the device, and cloud extraction is started as part of the phone examination process. These credentials are also saved so that an investigator can either use the token or the account login details at a later date.

MOBILedit Cloud Forensic as a standalone product

For investigating cloud storage and cloud services without the need to examine mobile devices. Access to clouds using this method requires a password and a username or a token imported from another source.

In both cases, you can investigate more than one cloud at a time, and extractions will run concurrently to help you work faster and retrieve more evidence quickly.

The extractable amount of data is as big as the cloud account. Therefore, you will have to take storage capacity into consideration or filter by time frame at the point of extraction. Additionally, tokens do have an expiration date depending on the service provider.

FEATURES

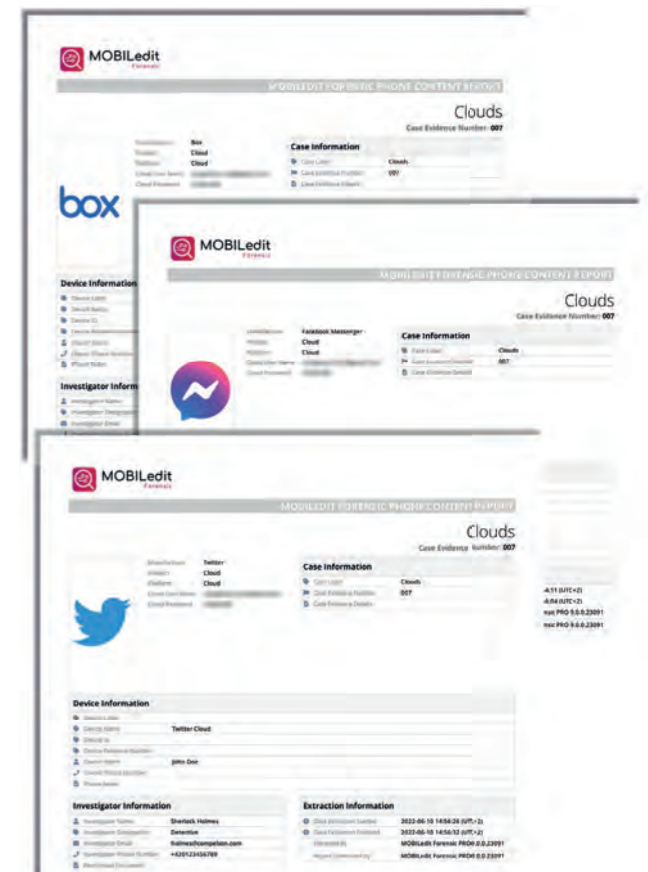

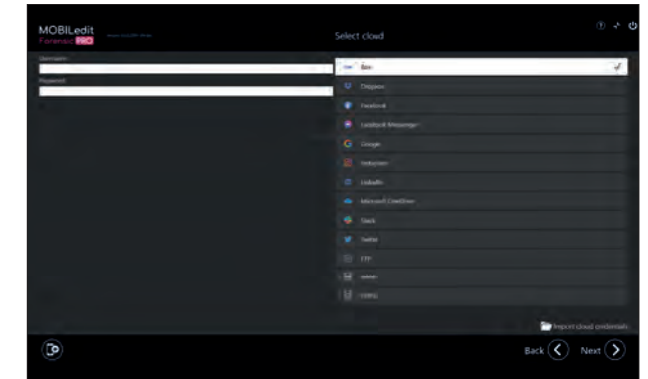

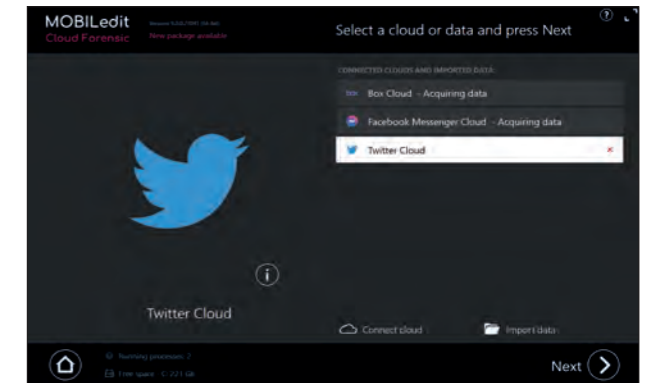

- Automatic download of clouds using either an authorization token or a username and password credentials. These can be found, extracted, and saved from a phone during extraction and analysis with MOBILedit Forensic PRO.
- Both authorization token access and username and password access are supported. An authorization token is a file saved on a computer or mobile device. It recognizes a device and account to allow a user to log in to a service without having to enter a username and password every time.
- Manual access by entering a user name and password.
- Immediate and concurrent downloads that enable an investigator to work effectively while extracting the maximum amount of data in the shortest time possible. Time is critical because a user can wipe all data, a token could expire, or a password could be changed.
- Professional reports and exports in the following formats: pdf, html, xml, ufd, and Excel.
- Full file structure download.

SUPPORTED SERVICES

- Box
- Dropbox
- Google Drive
- Microsoft OneDrive
- FTP
- Facebook
- Facebook Messenger
- Google Contacts, Calendar, Keep
- Instagram
- LinkedIn
- Slack
- Twitter
- Emails such as Gmail, Outlook, and many others through POP3, IMAP protocols
- and more

WHY CLOUDS?

- By 2025 it is estimated that half of the world's data will be in the cloud, accounting for 100 zettabytes. That's 100 billion terabytes of data. (Cybercrime Magazine - Page One For The Cybersecurity Industry)
- The average person is storing 500 GB of data in their personal cloud storage. Regarding text documents alone, the average person stores around 130 GB of these in the cloud, which equates to 10 million pieces of paper. Now imagine the possible amount of evidence hiding there. (pCloud - The Most Secure Cloud Storage)
- Facebook Messenger is one of the leading messaging platforms in the US, with more than 2 million monthly downloads. More than 20 billion messages are exchanged between businesses and users monthly on Facebook Messenger. (Home - Review42)

Elcomsoft Mobile Forensic Bundle

The complete mobile forensic kit in a single pack. Perform physical, logical and over-the-air acquisition of smartphones, tablets and wearable devices, break mobile backup passwords and decrypt encrypted backups, view and analyze information stored in mobile devices and cloud services.

YOUR BENEFITS

All in one

A single purchase delivers all ElcomSoft products in their respective top-of-the-line editions that allow recovering passwords and decrypting encrypted data.

Industry-certified technologies

Elcomsoft is Microsoft Silver Certified Partner, Intel Software Partner and member of NVIDIA CUDA/ GPU Computing Registered Developer Program.

Research and development

The password recovery suite features the latest and most advanced cryptanalysis algorithms developed by ElcomSoft research department. We continue to deliver cutting-edge technologies in password recovery and data decryption.

Patented technologie

ElcomSoft pioneered many software innovations that have made it easier to access protected data. The GPU acceleration, which is patented (U.S. Pat. No. 7,787,629 and 7,929,707) and unique to ElcomSoft products, making password recovery up to 250 times faster compared to traditional methods, is just one of the innovations.

TOOLS FOR MOBILE FORENSICS

Comprehensive Mobile Forensic Solution

The Elcomsoft Mobile Forensic Bundle includes the most essential tools for fast, safe and forensically sound acquisition, decryption and analysis of evidence from a wide range of mobile platforms and cloud services.

Forensic analysis of Apple devices

The newest jailbreak-free low-level access to data offers direct, safe and forensically sound extraction for Apple devices running all versions of iOS from iOS 11 through iOS 13. The new agent-based acquisition provides full file system extraction and keychain decryption without a jailbreak and literally no footprint. The complete forensic acquisition using jailbreak is also available.

Obtain iCloud backups, download photos and synced data, access iCloud passwords

Try the most comprehensive iCloud data acquisition on the market enabling forensic access to evidence stored in the cloud with and without the Apple ID password. Access cloud backups, call logs, messages, passwords (iCloud Keychain), contacts, iCloud Photo Library, iCloud files, Apple Health and Screen time, geolocation data and a lot more.

Break passwords to iOS system backups

Brute-force passwords protecting encrypted iOS backups with a high-end tool. GPU acceleration using AMD or NVIDIA boards helps achieve unprecedented performance, while access to users' stored passwords enables targeted attacks with custom dictionaries.

GPU acceleration: patented technology significantly reduces password recovery time

The company's patented GPU acceleration applied to breaking passwords protecting iOS backups is unmatched by competition. ElcomSoft pioneered asynchronous GPU acceleration, enabling simultaneous use of multiple video cards by different makes, models and architectures (AMD and NVIDIA) in a single PC for faster and more cost-effective attacks.

Dictionary attack

Using the prepared dictionaries based on leaked password databases or wordlists with highly customizable mutations targeting the human factor and common password patterns. The tool supports a variety of mutations, trying hundreds of variants for each dictionary word to ensure the best possible chance to recover the password.

Full over-the-air acquisition of Google Accounts

Google collects massive amounts of information from registered customers. The Mobile bundle includes the powerful and lightweight forensic tool to extract information from the many available sources, parse and assemble the data to present information in human-readable form. Extract and analyze user's detailed location history, search queries, Chrome passwords and browsing history, Gmail messages, contacts, photos, and a lot more.

Support for popular instant messengers: WhatsApp, Skype, Signal etc.

Extract, decrypt and view WhatsApp, Skype, Signal and Telegram communication histories, attachments and contact lists from a wide range of devices or cloud services. The downloading of the conversation histories, when available, only takes minutes!

Fast download, search and analysis

With Elcomsoft mobile forensic tools investigators can save time by reviewing essential bits of information in just a few moments. By quick downloading selective information, instant filtering and quick search functionality examiners obtain essential information in a matter of minutes.

Reporting and Exporting

A wide range of HTML reports are available. HTML reports can be easily printed or viewed in any Web browser. In addition, data can be exported into an Excel-compatible XLSX file for further processing and analysis.

Education and consulting

We offer comprehensive three-to-five-day courses offering hands-on experience in unlocking and extracting evidence from mobile devices, accessing password-protected and encrypted computer data.

IoT Forensic Solution

XCOUSTIC mini X40

Remote Audio Monitoring Device

Powered by Laser & Light Wave Technology

mini X
XCOUSTIC

Up to
40m
Effective Range

PRODUCT OVERVIEW

The system adopts Doppler diffuse reflection optical laser technology, matrix detection technology, auto digital focusing technology and other innovative achievements.

With long distance, no preset, and non-contact application environment, it can realize the synchronization of target sound information tens of meters away. Collection, which effectively meets the needs of relevant departments for the collection of target sound information, is an important means to obtain sound information.

The system has obvious advantages in sub-nanometer weak vibration measurement and weak return light detection capability, and has outstanding advantages in target medium adaptability, working distance, window angle and so on.

The system is highly integrated, easy to operate, easy to carry, and quick to deploy, and;

HIGHLIGHT FEATURES

- **Distance sound pickup** - Equipped with automatic focusing function, it can accurately locate the sound pickup area, and the sound pickup distance up to tens of meter;
- **Lightweight and convenient** - The equipment weighs less than 2.5KG, making it the smallest and lightest among similar equipment and easy to carry;
- **Easy to operate** - There are few steps to operate: power on-> point-> focus->play sound, the device is quickly deployed and easy to use. Mobile phones, tablets, and computers can all pick up sound through mobile networks or Wi-Fi connections, and operate through software to achieve human-machine separation and wireless control;
- **Strong penetrating power and wide application range** - Lasers can penetrate glass and collect audio information.
- **Scope of application:** Including common indoor furnishings (paper boxes, curtains, paper table tags, paper bags, etc.); common outdoor furnishings (billboards, trash cans, license plates, etc.);
- **High stability and anti-interference** - The laser collects audio in a small range to avoid interference from the surrounding environment, and uses advanced algorithms to perform multiple processes such as noise reduction, equalization, and filtering on the audio to restore stable, high-fidelity audio;
- **Audio and video integration** - The software interface has video functions to achieve audio and video integration;
- **With ranging function** - Ranging range: Up to 40m, ranging accuracy: $\pm 3\text{cm}$.
- **Monitoring capabilities on a wide range of materials:** It is possible to pass through single clear glass windows. Paper, leather, cloth, plastic, metal and other material objects can be used as the target medium.
- **Optional additional noise reduction functions** that has high voice recognition ability.
- **Multi-functional mobile operation terminal** is wirelessly connected with the host, which integrates "viewing, aiming, listening, recording and transmitting" to realize remote control operation.
- **Using invisible infrared laser**, low power and safe.
- **Multi-power mode**, (optional) built-in battery design improves the flexibility of the system.

MAIN COMPOSITION	
1. Xcoustic Unit	2. Android Operating Terminal
3. Headphones	4. Tripod (optional)
5. High-Precision Fine-Tuning Gimbal (optional)	6. Cable Set
7. Field backpack / Rugged Field Equipment Case	8. Accessory

TECHNICAL SPECIFICATION	
Working Distance	Up to 40m
Transfer Method	Wired/Wireless transmission
Recording ability	Long range recording, stable, recognition rate $\geq 90\%$ 65dB (In A Good Environment)
Laser	1550nm Infrared laser wavelength
Camera	Built-in wide-angle color CCD telephoto sensitivity $\leq 1\text{lux}$ night vision CCD
Communication	Built-in Wi-Fi module for wireless connection with operator terminal
Interface	Power interface
	Data transfer interface
	Wifi antenna interface
Power Supply	AC220V/battery Working voltage: 12V
	Built-in time: ~3 hours Lithium battery capacity: >300mAh
Host Weight	2.5kg
Host Size (mm)	160x160x68
Operating Temperature	-10°C~+40°C
Recording	Audio and video simultaneous recording format: mp4

Rugged Field Equipment Case Color option

Custom Design Available

Custom designs are available for clients such as law enforcement agencies, specifically tailored to meet the stringent environmental and operational requirements essential for successful covert operations. These designs enhance their ability to gather intelligence efficiently and effectively while maintaining a discreet low profile in public area.

Note: All design, features, contents, functionality and specifications of products described are subject to change without notice. Please check for the latest update.

XCOUSTIC X2

Remote Audio Monitoring Device
Powered by Laser & Light Wave Technology

X²
XCOUSTIC

Up to
200m
Effective range

PRODUCT OVERVIEW

The system adopts Doppler diffuse reflection optical laser technology, matrix detection technology, digital focusing technology and other innovative achievements.

With long distance, no preset, and non-contact application environment, it can realize the synchronization of target sound information hundreds of meters away. Collection, which effectively meets the needs of relevant departments for the collection of target sound information, is an important means to obtain sound information.

The system has obvious advantages in sub-nanometer weak vibration measurement and weak return light detection capability, and has outstanding advantages in target medium adaptability, working distance, window angle and so on.

The system is highly integrated, easy to operate, easy to carry, and quick to deploy, and;

HIGHLIGHT FEATURES

- **Long distance sound pickup in environments such as inside vehicles, buildings, or other locations** - Equipped with automatic focusing function, it can accurately locate the sound pickup area, and the sound pickup distance up to hundreds of meters;
- **Lightweight and convenient** - The equipment weighs less than 5KG, making it the smallest and lightest among similar equipment and easy to carry;
- **Easy to operate** - There are few steps to operate: power on->point->focus->play sound, the device is quickly deployed and easy to use. Mobile phones, tablets, and computers can all pick up sound through mobile networks or Wi-Fi connections, and operate through software to achieve human machine separation and wireless control;
- **Strong penetrating power and wide application range** Lasers can penetrate glass and collect audio information. Scope of application: Including common indoor furnishings (paper boxes, curtains, paper table tags, paper bags, etc.); common outdoor furnishings (billboards, trash cans, license plates, etc.);

- It is possible to pass through single clear glass windows.
- Paper, leather, cloth, plastic, metal and other material objects can be used as the target medium.
- Optional additional noise reduction functions that has high voice recognition ability.
- Multi-functional mobile operation terminal is wirelessly connected with the host, which integrates "viewing, aiming, listening, recording and transmitting" to realize remote control operation.
- Using invisible infrared laser, low power and safe.
- Multi-power mode, (optional) built-in battery design improves the flexibility of the system.

MAIN COMPOSITION	
1. Xcoustic Unit	2. Android Operating Terminal
3. Headphones	4. Tripod
5. High-Precision Fine-Tuning Gimbal	6. Cable Set
7. Field backpack / Rugged Field Equipment Case	8. Accessory

Note: Design, features, functionality and specifications are subject to change without notice. Please check for the latest update.

Rugged Field Equipment Case Color option

TECHNICAL SPECIFICATIONS	XCOUSTIC X1	XCOUSTIC X2
Working Distance	Up to 100m	Up to 200m
Transfer Method	Wired/Wireless transmission	
Comprehension Rate (In A Good Environment)	≥ 90% 65 dB (in good environments)	
Laser Wavelength	1550nm	
Laser power	≤ 16mW	
Dual Vision Lens	25 mm wide-angle lens	
Camera	Built-in wide-angle color CCD and two sets of telephoto sensitivity ≤1lux night vision CCD	
Communication	Built-in Wi-Fi module for wireless connection with operator terminal	
Interface	Power Port	
	Wi-Fi Antenna Port	
	RJ45 Data Port	
	3.5mm Headphone Port	
Power Supply	Built-in time: >3 hours	
	AC220V/battery (<15W)	
Host Weight	≤2.0kg	≤5.0kg
Host Size (mm)	200×130×80	274×125×184
Operating Temperature	-10°C~+40°C	
Recording	Audio and video simultaneous recording format: mp4	

MD-VIDEO AI

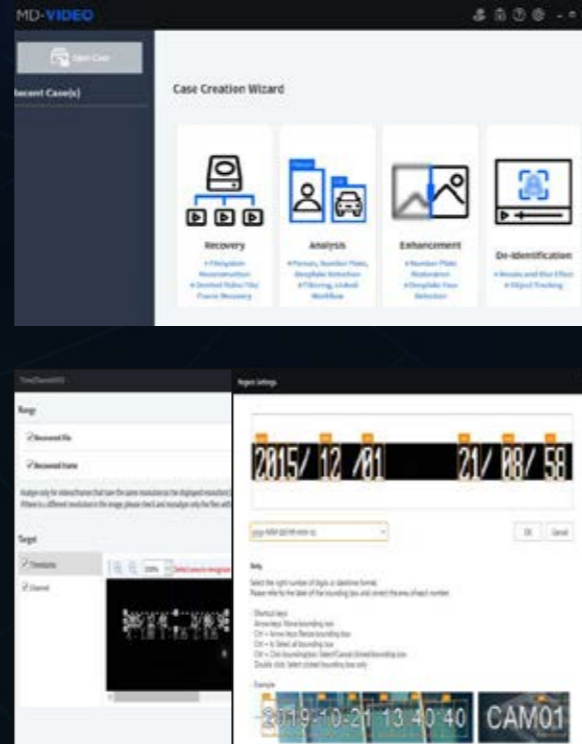

MD-VIDEO AI is an AI powered video forensic software solution designed for the recovery, enhancement and in-depth analysis of media files from a wide range of recording devices, including CCTV/DVR systems, vehicle dashcams, drone cameras, IoT cameras, and more.

Multimedia Recovery

Video/Audio/Frame

- Recovery of deleted video, audio and frame data
- Frame extraction from video files
- Codec and Container-based recovery
- Partial recovery using time and metadata (H.264/H.265)
- Supports forensic image formats (E01, DD, 001, BIN, MDF)
- Supports recovery from RAID 0 and RAID 5 storage systems
- Broad support for DVR and Dashcam models
- Supports standard/proprietary filesystems and video formats
- File conversion to AVI/MP4, MP3/AMR, JPEG/PNG formats
- Audio extraction from video files
- Built-in advanced media player for forensic video investigation

Channel / Time Information

- Supports recovery of date/time information from file meta-data
- OCR based extraction of time and channel information
- Date/Time offset correction and adjustment

Video Analysis

Object and Anomaly detection

- Detect 80+ types of objects
- Specialized detection for Weapons (Knife, Pistol), License plates, and Faces
- Find one or more objects from one of more videos at once
- Detect small sized objects out of good resolution videos
- Robust filters mechanism to find clues out of detected objects
- Date/Time, Object, Color, Files, Area filters
- Video briefing by required detected objects for court
- Supports NVIDIA GPU models for accelerated video analysis

Search Suspects, Vehicle license plates

- Abnormal scene detection
- Find suspects out of multiple video footages
- Detect and Search specific digits of vehicle license plates
- Detect potential deepfake manipulations in facial content

Image/Frame Enhancement

- AI powered image and video frame enhancement functions
- Precision frame Cropping and Zoom (20~1000%)
- Image enhancement filters for Low-Light scenes
- Advanced Color, Sharpness & Noise control filters
- Corrects motion blur, camera shake and out of focus frames
- Perspective Correction & Image rotation
- Upscales low resolution frames using SRGAN and other deep-learning algorithms
- AI models for Estimating object length and vehicle speed
- Complete Enhancement Workflow with forensic reporting

Number Plate Restoration

- AI driven country specific License Plate restoration models
- Single and multi frame reconstruction for higher accuracy
- Intelligent candidate number prediction and refinement
- Works on Car, motorcycle, tricycle, truck and other vehicles

Face Restoration & Deepfake

- AI based deepfake detection for manipulated faces
- Provides deep fake confidence score (%) for analyzed faces
- Face restoration models to enhance blurry faces
- Restoration models optimized for facial attributes to improve enhancement accuracy

De-Identification

- Hide or blur sensitive areas in photo and video
- Track moving objects across video frames
- Trim and Split required or unwanted video segments
- Flexible & Precise editing tools for de-identification workflows
- Seamless export for reporting and court submission
- Privacy protection with GDPR compliance support

MD-CLOUD

MD-CLOUD is a forensic software for the extraction and analysis of data from cloud services. It supports a wide range of global and regional cloud platforms.

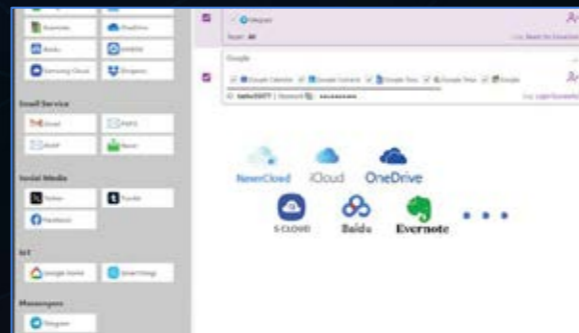

Global Service support

Global Cloud Support

- **Cloud Service:** Google Cloud, iCloud, OneDrive, Dropbox, Baidu Cloud, Naver Cloud
- **Email Services:** Gmail, IMAP/POP3, Naver Mail
- **Social Media:** Telegram, Facebook, X(Twitter), Tumblr
- **Productivity:** Evernote, MYBOX document storage

Region-Specific Services

- Selective/integrative analysis specialized for regional cloud platforms (e.g., Naver Cloud, Baidu Cloud)
- API-level data acquisition capabilities
- Localized authentication to support region-specific environments

Advanced Authentication

Multi-Layer Security

- **Various authentication methods:** ID/Password authentication, Captcha security authentication, 2-step security authentication, Authentication using Credential information
- **Auto Login:** Credential reuse and token preservation

Real-Time Monitoring

- **Progress Tracking:** Live extraction status updates
- **Data Integrity:** 3 hash algorithms (MD5, SHA-1, SHA-256)

Data visualization

- **Timeline Analysis:** Chronological data organization
- **Map Visualization:** Location-based evidence mapping
- **Tag System:** Pre-categorized data for fast search
- **Built-in Viewers:** Image, video (H.264/H.265), documents, emails

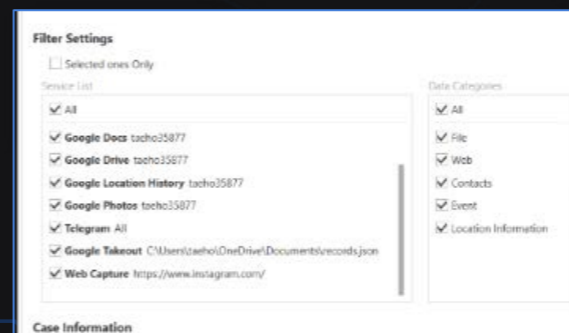

Interwork with MD-RED

- Supports analysis for extracted data by MD-CLOUD with MD-RED
- Supports reuse of session token in MD-CLOUD taken from data analyzed by MD-RED

Reporting

- Supports report format as PDF
- Supports export of original cloud data files

MD-DRONE

MD-DRONE is a forensic software designed to extract and analyze data from a wide range of UAV/Drone data sources. It supports multiple extraction methods across diverse models and delivers AI-powered analysis for advanced investigation of drone normal incidents and accidents.

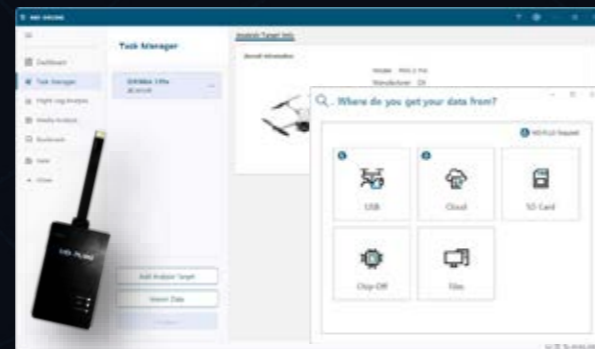

Data Extraction

Multiple Extraction Methods

- **Logical & Physical:** Comprehensive data recovery from drone storage sources
- **Chip-off Extraction:** Direct memory chip analysis for damaged devices
- **Extraction Media:** USB connection, Wi-Fi interface and external memory card readers, MD-PLUG, MD-READER
- **MD-PLUG Integration:** Advanced extraction support for modern drone models

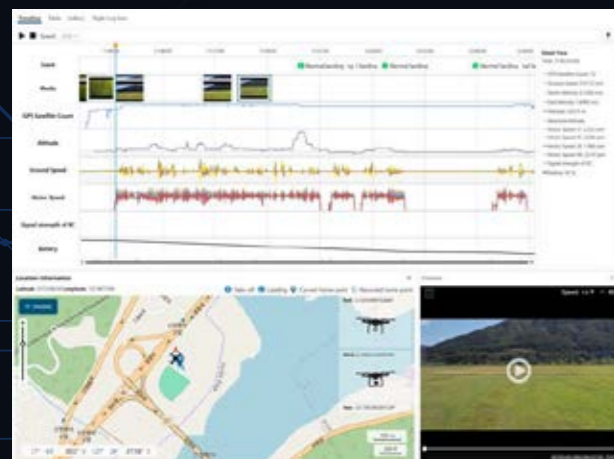

Data Source Support

- **Drone and Flight Controllers:** Broad model support with guided extraction workflows
- **Mobile Applications:** Extraction from Android drone apps and flight log data
- **Remote Controllers:** Direct data acquisition from RC devices
- **File Format support:** DAT, ULG, BIN, PUD, TXT, MDF, DRF, TLOG and SRT formats
- **DJI Integration:** DJI Assistant files and manufacturer-specific data

Flight Log Analysis

- **Integrated Analysis:** Flight log analysis across multiple targets
- **Multiple Visualizations:** Analyzed data presented in Timeline and Tabular views
- **Flight Parameters:** GPS coordinates, Speed, Altitude, Battery status and more
- **Map Visualization:** Flight path display with takeoff and landing points
- **In-built Media Viewer:** Multimedia previews synchronized with the timeline
- **Collision Analysis:** AI-based drone accident analysis

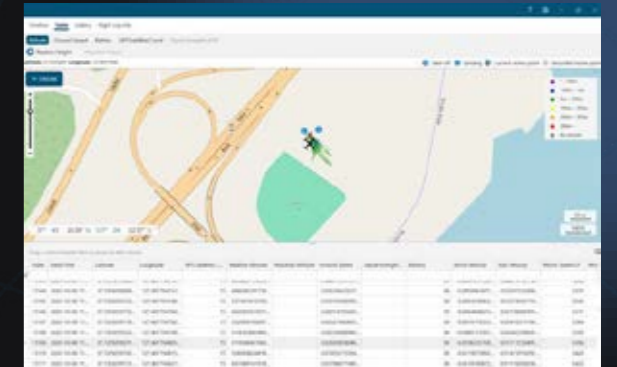

AI-Based Collision Analysis

Intelligent Event Detection

- **Collision Identification:** Automatic crash and impact events
- **Battery Analysis:** Power depletion and failure warnings
- **Abnormal Behavior:** Identification of unusual flight patterns and maneuvers
- **Landing Classification:** Detection of normal and abnormal landing events

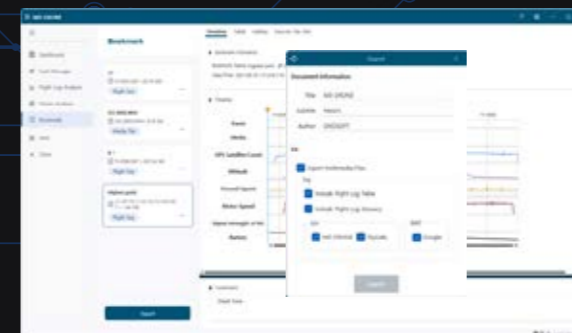

Event Visualization

- **Multimedia Gallery:** Preview synchronized with corresponding flight logs and timeline
- **Color Coding:** Green (normal) and red (abnormal) event markers for quick identification
- **Events on Map:** Visualization of takeoff, landing, and other major events using color coded flight paths
- **Event Counting:** Statistical overview of normal and abnormal events per flight log
- **Confidence Indicators:** AI analysis accuracy ratings

Bookmarks and Reports

- **Flexible Selection:** Flight time ranges, specific images, and videos
- **Comment System:** Add investigative notes to bookmarked evidence
- **PDF Reports:** Generate professional forensics reports with bookmarked evidence
- **Data Export:** Export DAT files in CSV format and flight paths in KML for GIS integration
- **Video Generation:** Export animated flight path visualizations as video file
- **Media Preservation:** Preserve original multimedia files with complete metadata
- **Multi-language Support:** English, Bahasa Indonesia, Japanese, Vietnamese

Smartwatch Forensics

Get the extra evidence from the most popular wearable devices

Smartwatches are the world's most popular wearable devices with unquestionable importance when it comes to forensic examinations. The personal data found in smartwatches can lead investigators in the right direction, especially when the phone is nowhere to be found. MOBILedit Forensic can extract heartbeat details, which gives the investigator an intimate look into the life of the user. This data can reveal moments of excitement, stress, and even time of death. For a successful investigation, examining smartwatches is not only an option but a necessity for every digital forensic professional.

MOBILedit Smartwatch Kit

Essential hardware for smartwatch forensic analysis

What's in the Kit?

This kit focuses on Apple Watch, Samsung, and Garmin smartwatches, while many other brands can be connected using the manufacturer's cables or Bluetooth. To perform smartwatch forensic analysis, the MOBILedit Forensic software is required alongside this kit.

SAMSUNG GALAXY WATCH READERS

The unique Samsung Galaxy Watch readers are designed and engineered by the MOBILedit team. With these two readers, data such as messages, geolocations, health data, heartbeats, and more can be obtained from the Samsung Galaxy Watch 2 up to the latest versions. Under certain conditions, it is possible to gain root access and extract the full, unencrypted file system. This means all the data stored on the smartwatch, and potentially more evidence for your investigation, can be accessed.

ALL-IN-ONE READER FOR APPLE WATCHES

This device can read data through a special diagnostic connector from Apple Watch Series 0 to Series 6.

GARMIN WATCH CABLES

Covering most models, these cables connect to Garmin watches through standardized connectors, providing access to a wide range of data.

The kit also includes several adapters for various Samsung Galaxy Watch models, tools for smartwatch handling, accessories for smartwatch connection, and both USB-C and Lightning cables.

Why smartwatch forensics?

Smartwatch forensic analysis can bring critical data beyond what is available from phone forensic investigations.

- 1 RICH SOURCE OF PERSONAL DATA**
Smartwatches collect a broad range of highly personal information, such as heart rate, body temperature, blood oxygen levels, health statistics, location history, and messages. This makes them a valuable resource for understanding an individual's detailed activities or behavior patterns.
- 2 LOCATION TRACKING**
Smartwatches often feature GPS capabilities, making them key in tracing movements, which is essential in cases of kidnappings or when verifying alibis. It is also common for individuals to leave their phones at home and use smartwatches as the only device during sports activities.
- 3 SMARTWATCHES AS THE SOLE SOURCE OF EVIDENCE**
When a phone is missing or damaged, smartwatches may serve as the sole source of digital evidence, offering unique insights that cannot be obtained from other devices.
- 4 SYNCHRONIZATION GAPS PROVIDE ADDITIONAL DATA**
Gaps in the synchronization of data between a phone and a smartwatch can reveal critical evidence. For instance, photos long deleted from an iPhone may still be present on an Apple Watch.
- 5 COMMUNICATION AND SOCIAL MEDIA ACTIVITY**
Users can access a wide array of apps on their smartwatches, generating valuable data. Linked to social and communication apps, smartwatches offer insights into texts, emails, and social media notifications that are relevant to investigations.

ALL MAJOR BRANDS SUPPORTED

As smartwatches gain popularity, the market's expansion to hundreds of brands makes forensic analysis challenging. The MOBILedit team, leading in smartwatch forensics since 2019, is focusing not only on all major brands including Apple, Samsung, Garmin, Huawei, Alcatel, TCL, Amazfit, Huami, Suunto, but also on many local brands of smartwatches.

MOBILedit Dive Kit

Dive computers are akin to smartwatches for divers, crucial when lives depend on them. In the event of an accident, dive computers retain comprehensive details about the dive, tracking adherence to safe diving protocols by the second. The MOBILedit Dive Kit is an essential hardware not just for coastal countries but also for those with lakes and deep waters, essentially covering almost all nations worldwide. To utilize this hardware, MOBILedit Forensic software is required. MOBILedit Forensic is capable of providing a complete and detailed dive log from over 200 models across all major manufacturers such as Suunto, Oceanic, Mares, Aqualung and others.

VEHICLE DATA RECONSTRUCTOR (VDR)

The Vehicle Data Reconstructor (VDR) is developed to set a new standard in digital forensics for vehicles. Designed to surpass existing solutions, VDR ensures comprehensive, reliable, and efficient data acquisition of crucial digital evidences from vehicles, providing forensic experts with easy-to-use tool with extensive possibilities and advanced features.

COMPREHENSIVE DATA ACQUISITION

VEHICLE-RELATED DATA

- ✓ **Vehicle System Data:** VIN, serial and part numbers, FW version, MAC/IP addresses, etc.
- ✓ **Events:** WIFI/Bluetooth/USB connections, vehicle power on/off, start/stop, reboots, door/light data, odometer, fuel consumption, system logs, etc.
- ✓ **GPS navigation data:** routes, tracklogs, POIs, trackpoints, destinations, GPS sync events, saved locations, etc.
- ✓ **Built-in applications:** Traffic, weather, radio, etc.

USER-RELATED DATA

- ✓ **Connected devices:** Smartphones, USB/SD cards, WIFI/Bluetooth logs, device list, timestamps, serial numbers, etc.
- ✓ **Smartphone synchronized data:** Device list, Calls, Phonebooks, SMS, Media, App data, etc.
- ✓ **Device identifiers:** Bluetooth/WIFI MAC addresses, phone names, WIFI access point info, installed apps.

HOW DOES IT WORK?

1 Data acquisition is performed either via chip-off or solderless adapter whether it's NAND or eMMC for all systems based on supported memory chips such as TSOP48, BGA63 (two sizes), BGA100, BGA153/169, BGA137, BGA107 and a universal adapter.

2 During physical image acquisition process the raw dump of the memory is extracted and converted into file system.

3 Files are analyzed and data is parsed according to the vehicle model and electronic unit. The case package is extracted for further analytics and report generation

4 A standalone data analytics and report generation software „VDR Report Manager“ is used to process data case package and generate report.

WHAT'S INCLUDED

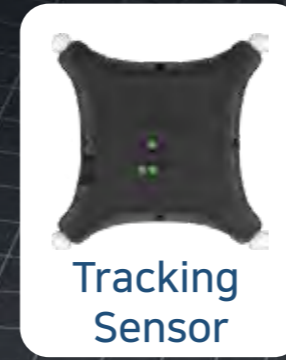

- ✓ Powerful software for physical dump acquisition and further vehicle data extraction, including parsers for File systems: QNX6, UBIFS, YAFFS2, FAT12,FAT16,FAT32,exFAT, Ext2, Ext3, Ext4, NTFS, HFSX, others embedded systems based on FTLs.Embedded FTLs
- ✓ VNR software
- ✓ Set of chip-off adapters for NAND Flash and eMMC memory chips:
TSOP48 NAND, BGA63 11x9 NAND, BGA63 13x8.5 NAND, BGA100 NAND, BGA107 NAND, BGA137 NAND, BGA162 NAND, BGA100 14x18 eMMC, BGA153/169 11.5x13 eMMC, BGA153/169 12x16 eMMC, BGA153/169 14x18 eMMC, Soldering adapter
- ✓ VNR adapters: TSOP48 ZIF, LGA52 ZIF, BGA100, BGA152, Monolith
- ✓ 1 year of Support Subscription
- ✓ Vehicle Data Reconstructor Report Manager - Forensic managing and report generating tool
- ✓ Rusolut Reader for reading NAND chips and adapters control
- ✓ Non-invasive ISP NAND and eMMC adapters enabling direct data extraction from memory chips similar to the chip-off method but without the need to unsolder the chips, thus preserving the integrity of the system without any destroys*
- ✓ Widest database of solutions for vehicle electronic modules

* The number of adapters is updated at the time of purchase

Convergence of civil Virtual Reality development technology and military training

Large-space hybrid simulation training system based XR technology for strengthening of combat power

Examples of personal training equipment

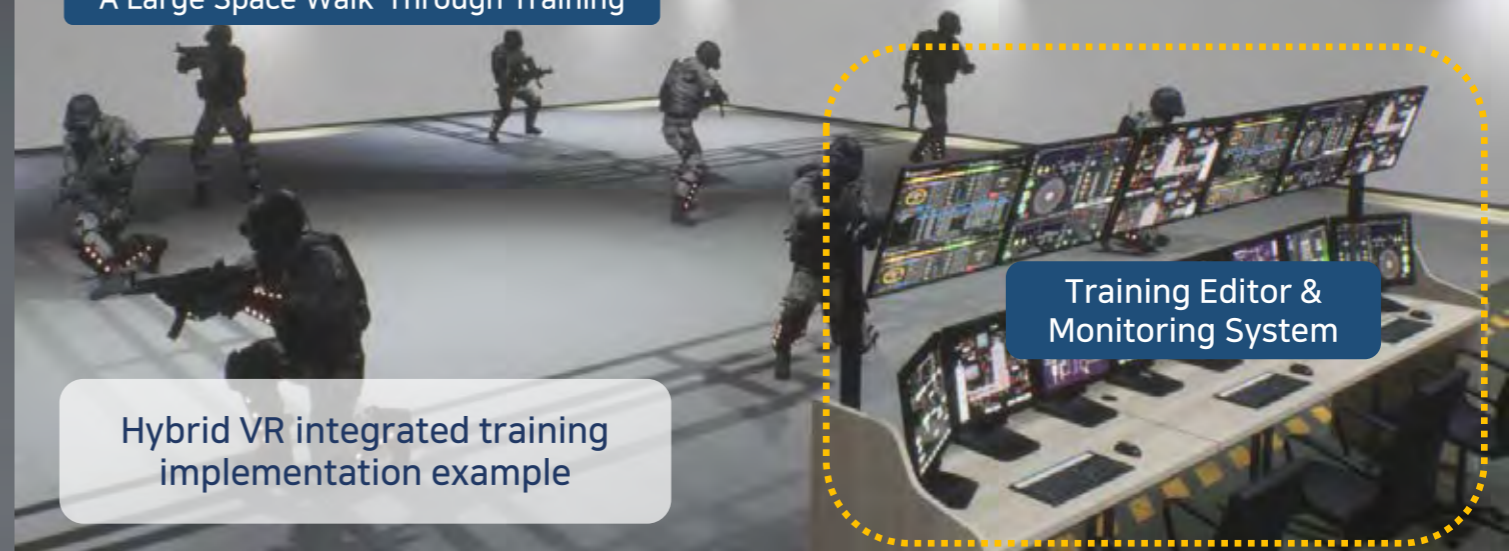

IR camera based Position and motion tracking

Multiplayer (Maximum of 8)

A Large Space Walk-Through Training

Training Editor & Monitoring System

Hybrid VR integrated training implementation example

Large-space hybrid simulation training system based XR technology for strengthening of combat power

HYBRID Virtual Movement

Both large-scale tactical training and CQB (Close Quarter Battle) training are possible by mixing walk-through and controller operation methods.

Up to 8 multi-play

Up to 8 or individual or team play

Haptic & Real-like device

Real-like gun Glove for hands tracking

Large Space Virtual Training

The Largest Training Area

Scenario Editor

Detailed training settings such as environment, climate, AI, etc.

Real-like Graphic

High quality of graphic for real-like experience

Indoor Operation

Outdoor Operation

The world's first VR gun shooting game development and large space virtual reality training simulator specialized developer.

Limitations of Existing Military Training

- Increasing demand for advanced Science training
- Limitations
- Lack of location, cost, time & Training content
- Lacking teamworking Training program

Testing facilities for a large space-based training

Large-space hybrid simulation training system based XR technology for strengthening of combat power

special warfare virtual simulation training

DTaQ business in progress

Chemical accident response training

NICS is officially in operation

Police officer field response virtual reality training

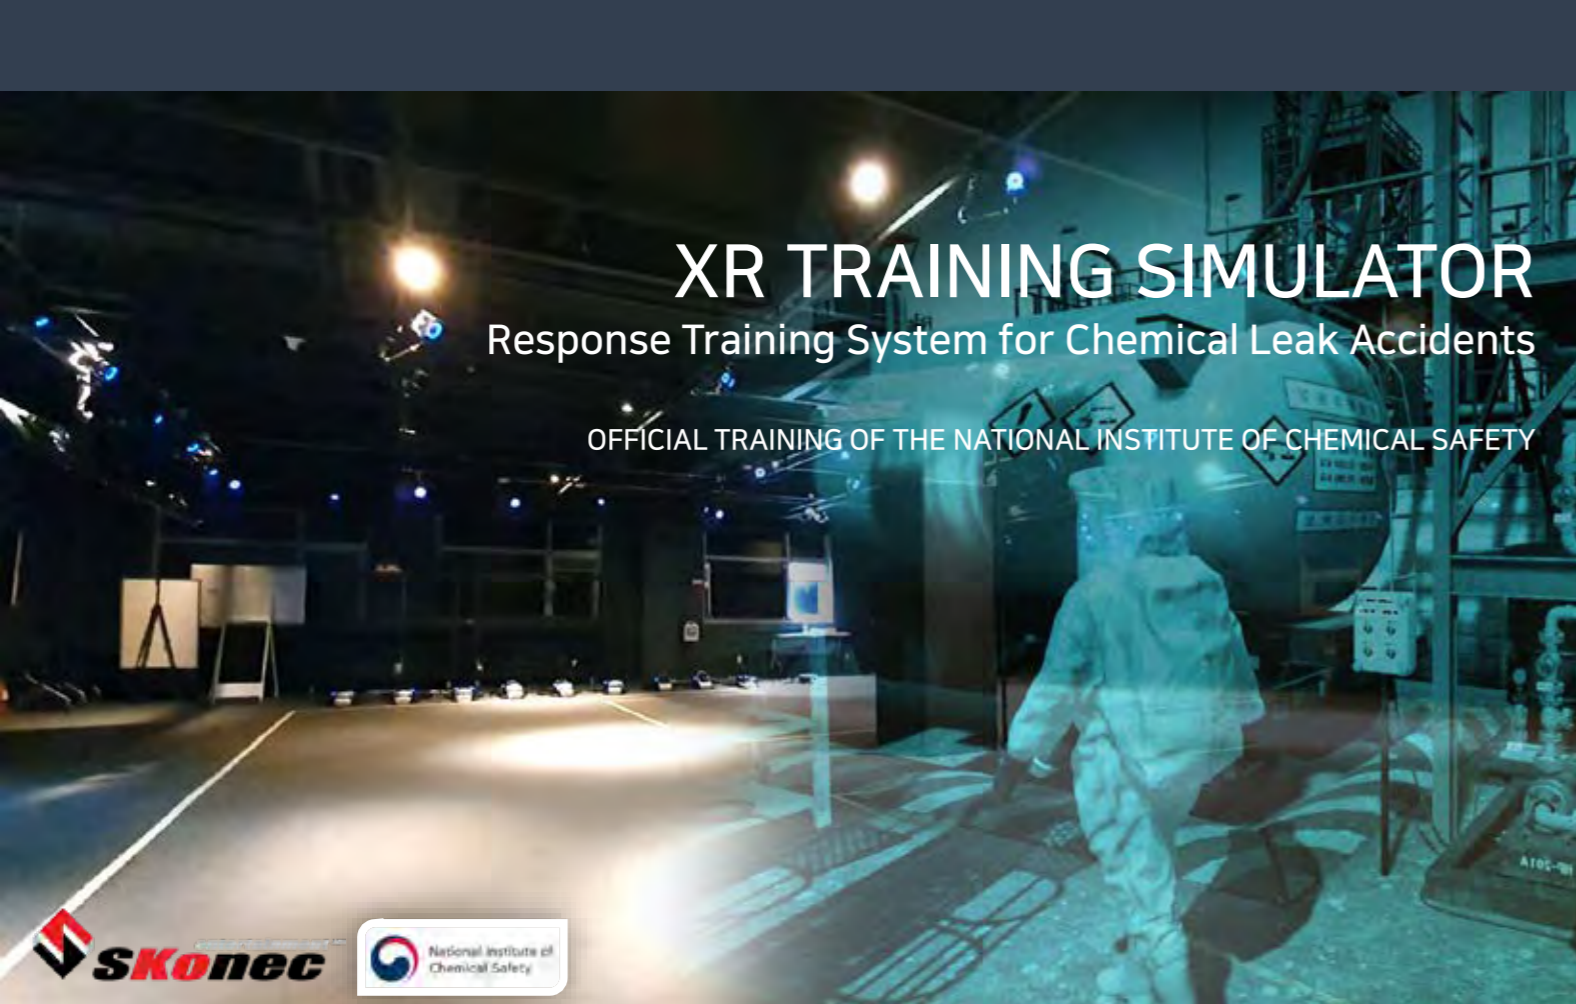

KOREA NATIONAL POLICE AGENCY business in progress

Fire Situation Response Training

NATIONAL FIRE AGENCY business in progress

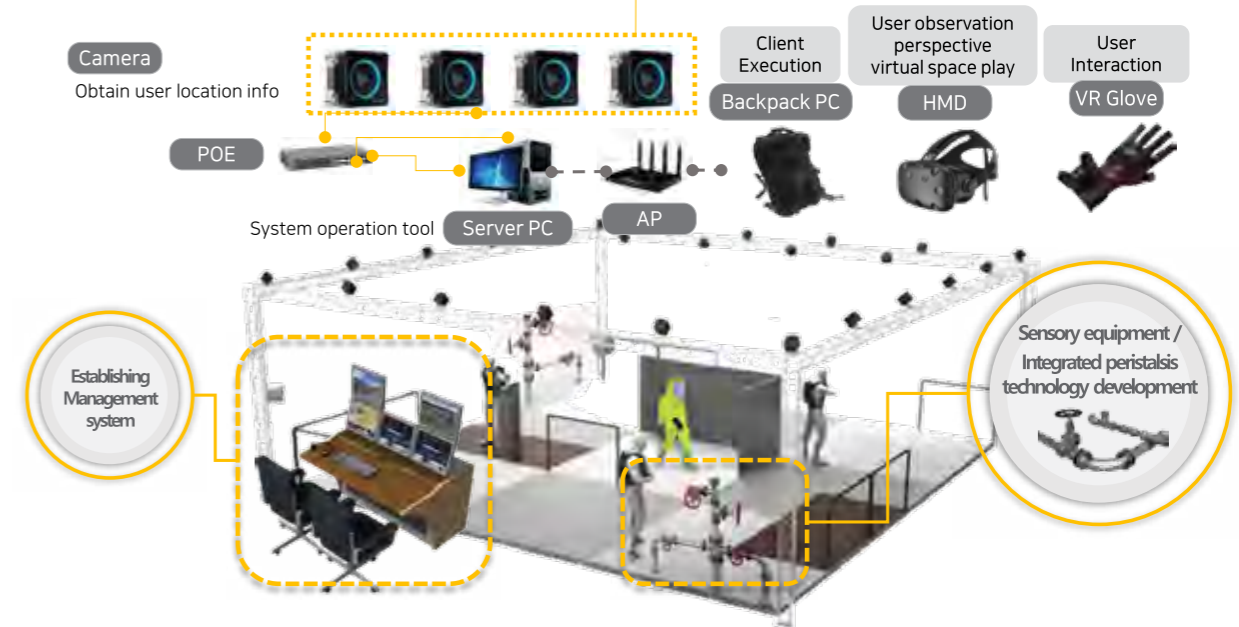

Possessing experience in supplying VR solutions to domestic and overseas VR experience zones, public institutions, and military bases.

COMPOSITION OF VR TRAINING SYSTEM

XR TRAINING SIMULATOR
Response Training System for Chemical Leak Accidents

Track the motion of multiple users by utilizing a location tracking camera, establish a system that shares location information data generated from the trainee's equipment to the server

A training system based on real-time location and motion tracking using an optical motion capture camera

OVERCOMING LIMITATIONS IN PHYSICAL

XR TRAINING SIMULATOR
Response Training System for Chemical Leak Accidents

CONTENTS

XR TRAINING SIMULATOR
Response Training System for Chemical Leak Accidents

- Danger and hazards of the substance itself → Building a world that doesn't exist in reality
- Difficulty in Reproduction → Impossible manipulations are possible in VR
- Implementation of various incidents (equipment, process, etc.) → Optimization of training for specific functions
- Difficulty of experiencing → Able to have a realistic experience

- Training with 'Vive' VR Devices
- 17 scenarios according to the space of storage and charging facilities

- Chlorine: Consists of a total of 17 scenarios, Basic, Beginner, Intermediate progress sequentially according to the training scenario
- For the advanced, 1-5 people participate to solve various accidents through collaboration

- Hydrochloric acid & Hydrofluoric acid : Consists of a total of 22 & 20 scenarios each.
- Those scenarios have a lot of freedom of action
- For the advanced, 1-5 people participate to solve various accidents through collaboration

Content design/ Scenario production and inspection/ Training evaluation criteria and index design
More than 60 training scenarios verified by experts

The world's VR gun shooting game development and VR·XR simulator specialized developer

Increasing demand for advanced training system

Limitations of existing system

Insufficient of cost, time & trainig contents

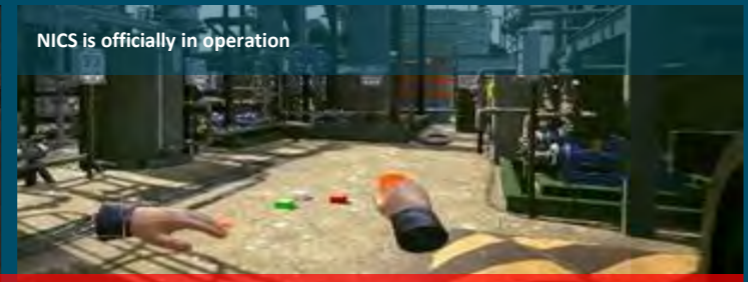

POLICE ONE

XR technology tangible training system for law enforcement of police officers

DTaQ business

NICS is officially in operation

Skonec has supply experience in VR Solution to domestic public institutions, military and overseas VR game park

National Fire Agency business

Air Force Business

Virtual Reality program to law enforcement for police officers

Portable VR system

1SET

Touch-Monitor

PC

HMD

Integrated VR base station

- Ensure stability in training
Enables safer police education and training
- Improved on-site response capabilities
Achieve on-site response capabilities through VR
- Time cost savings
Train at the time and place you want
- Spreading understanding of the police officer
More easily understand and experience the police officer

POLICE ONE

XR technology tangible training system for law enforcement of police officers

Cooperative Training system

Real-like cooperative training system, for two people

Portable VR training system

Portable VR All-in-One equipment

Variable multi-scenario

8 types of scenarios corresponding to actual sites in preparation for various sudden situations

Development of intelligent NPC behavior simulation

NPCs save behavioral information in the knowledge base system

VR GUI interface

Set up an information space GUI that anyone can easily recognize

After action review system

Trainee evaluation managing system

IT ASSET DISPOSITION

Degausser

ADC MagWiper MW-15X Degausser

The world's first 10,000+ Oe high-power degausser with a quick 17-second charge.

Model: DEA-MW15000X

Simultaneous Erasing Capacity

 3.5" HDD: 1 unit | 2.5" HDD: 6 units

Charging time

17 seconds

Magnetic Field Generated

800 kA/m (Approx. 10,000 Oe)

ADC MagWiper MW-25X Degausser

Erase 100 units of 3.5-inch HDDs about 17 minutes without remove the mounting brackets.

Model: DEA-MW25000X

Simultaneous Erasing Capacity

 3.5" HDD: 2 units | 2.5" HDD: 10 units

Charging time

20 seconds

Magnetic Field Generated

800 kA/m (Approx. 10,000 Oe)

Features

17-second quick charge, the fastest in the industry

The first 10,000+ Oe high-power degausser with a quick 17-second charge which means can erase data with higher efficiency.

World's first degausser using a diagonal magnetization system

The most effective for erasing data from perpendicular magnetic-recording HDDs, improving erasing efficiency by roughly 50% over conventional methods. (Erasing capacity equivalent to 1200 KA/m.)

Magnetic force checking function

The monitor displays the strength of the magnetic field after it is generated. The ability to check the strength of the magnetic field each time improves the reliability of the erasing operation.

Can also use to erase magnetic data stored on tape

Erases cartridge tapes, including open reel, LTO/DAT/DLT/CMT/9940/3592/VHS, as well as floppy disks and other magnetic-recording media in one speedy operation.

Features

Can Erase data without removing the mounting brackets

Erases magnetic data from two HDDs simultaneously no need to remove the mounting brackets.

World's first degausser using a diagonal magnetization system

The most effective for erasing data from perpendicular magnetic-recording HDDs, improving erasing efficiency by roughly 50% over conventional methods. (Erasing capacity equivalent to 1200 KA/m.)

Magnetic force checking function

The monitor displays the strength of the magnetic field after it is generated. The ability to check the strength of the magnetic field each time improves the reliability of the erasing operation.

Can also use to erase magnetic data stored on tape

Erases cartridge tapes, including open reel, LTO/DAT/DLT/CMT/9940/3592/VHS, as well as floppy disks and other magnetic-recording media in one speedy operation.

ADC MagWiper MW-30X Degausser

Large model can simultaneously erase up to 51 units of 2.5" HDDs and B4 notebooks without dismantling.

Model: DEA-MW30000X

Simultaneous Erasing Capacity

 3.5" HDD: 14 units | 2.5" HDD: 51 units

Charging time

25 seconds

Magnetic Field Generated

800 kA/m (Approx. 10,000 Oe)

ADC MagWiper NSA Degausser

NSA EPL listed compact, lightweight and efficient instant degausser.

Model: DEA-MW1B

 NSA EPL Listed

Simultaneous Erasing Capacity

 3.5" HDD: 1 unit | 2.5" HDD: 8 units

Charging time

15 seconds

Magnetic Field Generated

1,592 KA/m (Approx. 20,000 Oe)

Features

Can erase data from a B4-size laptop intact (100% degaussing)

The large chamber enables erasure of this large number of media simultaneously. You can even erase the data from a B4-size or A4-size notebook PC without removing the HDD.

World's first degausser using a diagonal magnetization system

The most effective for erasing data from perpendicular magnetic-recording HDDs, improving erasing efficiency by roughly 50% over conventional methods. (Erasing capacity equivalent to 1200 KA/m.)

Magnetic force checking function

The monitor displays the strength of the magnetic field after it is generated. The ability to check the strength of the magnetic field each time improves the reliability of the erasing operation.

Can also use to erase magnetic data stored on tape

Erases cartridge tapes, including open reel, LTO/DAT/DLT/CMT/9940/3592/VHS, as well as floppy disks and other magnetic-recording media in one speedy operation.

Facilitates centralized management and control (key entry system)

To enhance safety, this model will not function without insertion of a power key in the front panel. The power key remains in the care of a manager to prevent illicit erasure of data and accidents.

Comes with a special mobile lifter

The special lifter improves operational efficiency by enabling you to move the unit safely from one site to another without the need to load and unload it on a mover each time.

Features

Safety

The MagWipers have been tested to validate safe operation with low-level field leakage.

Erase Simple Operation

Only need to insert the target in the chamber, push the "Erase" button, and remove the target.

Malfunction Alarm

If the magnetic flux density drops below a specified value, an alarm LED lights.

Cooling Function

A cooling fan operates as required during the operation.

Door Lock

The chamber door locks on closure to prevent operator hand insertion, or target ejection.

Government Standards

Meets PCI DSS, Data Security Standard, NIST Guidelines, NIST SP 800-36, NIST SP 800-88,

Portable

Relatively small and light. Easily transported to various locations for on-site media erasure.

Flux Density Display

A front-panel LCD displays the magnetic flux density used for the data erasure.

Operating Indicator

A flashing light at the chamber door edge visually confirms that a magnetic field is generated.

LCD Display

The LCD shows total number of erasures and magnetic field intensity used for the last erasure.

Use of Trays

Permits preparation of next load during recharge.

Duplicator & Wiper

DiskClon DC6000 Series

Disk Duplicator & Wiper

DiskClon is the product to duplicate and wipe various media (HDD, SSD, CF, SD, mSATA, NGFF) at fast and stable speed of 7GB/min on average, which enables to manage the original disk using the disk image file method and duplicate it optionally as the disk has a disk backup function.

This is the best solution for duplication and wipe that enables to maximize small quantity batch production, maintenance of various products, convenience of data wipe, and work efficiency as it is available to work on all ports individually when duplicating images or wiping data.

What is a duplicator with disk imaging method?

DiskClon can back up the contents of original hard disk in the device as disk image file for storage and management. It is available to duplicate the stored image disks without master hard disk.

- Easy to connect disk by jig
- Support interfaces such as IDE, SATA, SAS
- Manage and duplicate by disk image file
- Wipe disks completely and create a report

Main Feature

- Fast and stable duplication and deletion speed at average 7GB/m ~ max. 20GB/m
- Support Disk to Disk and Image to Disk
- Support Multi Image Copy
- Backup the manage the original disk image files from all ports
- Wipe by international standard method (DoD)
- Support hot swap (Wipe each port)
- Create wipe report
- Compare the original data and the duplicated data by sector unit and if an error is discovered during inspection, correct the error in real time.
- If the size of disk to duplicate is different, readjust the partition of the target disk automatically
- Record log file of used history

DiskClon DC6000 Series

Disk Duplicator & Wiper

Why DiskClon Needed?

1 Mass media production & maintenance

Duplicate the contents of original media in the target disk in large quantities and and conduct the maintenance

2 Plug & Wipe

Reduce a great deal of time to delete using the function of deletion by port

3 Small quantity batch production and various media management

Available for duplication of different media for each port, which enables to duplicate multiple products and different products

4 Create a report for the result of deletion automatically after deleting

After deleting, create a report that records details such as PC, storage media, working time, working method etc.

NetClon NC1000 Series

Network-based Disk Duplicator & Wiper

NetClon is network-based media duplicator and wiper that enables to duplicate, wipe and manage the original image through network interface without separation the storage from device in the world only.

This allows duplication and wipe regardless of types of embedded storage media as it controls the target system using a network booting technology. It is not necessary to purchase an additional device for each media type and this can reduce unnecessary work time.

What is a Network-based Disk Duplicator & Wiper?

NetClon can backup to internal storage from original disk by image and duplicate to target device by network connection. In addition, it is available to secure wipe without separation disk from device

Duplicate/wipe all type of storage media without separation from the device

Main Feature

- Network-based duplication and wipe (RJ-45 port)
- Duplicate, wipe and manage without separation disk from target device
- Duplicate and wipe regardless of disk type and interface of target device
- Support duplication that allows booting even if hardware of backup target device and duplication target device is not the same (support the duplication between different models)
- Manage by image file of backup
- Support simultaneous duplication function of the same image suitable for mass production and maintenance
- Support individual image duplication function by product suitable for small quantity batch production and maintenance
- Automatic duplication when connecting by image file registration and settings by model of duplication target device
- Support international DoD wipe method, which does not allow restoration
- After secure wipe, create a report for details of work automatically
- After secure wipe, proceed with automatic duplication and after completion, support the automatic closing

NetClon NC1000 Series

Network-based Disk Duplicator & Wiper

Why NetClon Needed?

1 An increasing number of storage media having various interfaces

Available to work with various storage media such as HDD, SSD, mSATA, NGFF, eMMC, SD Card, Flash Memory, DOM, CF Memory, etc. as well as future storage media

2 Small quantity batch production and maintenance of various products

Available for simultaneous duplication of different systems for each port, which enables to duplicate multiple product and different models at the same time

3 Duplication solution optimized for Cell production method

Unification of duplication process regardless of media type and available to duplicate and inspect after production of finished products. Optimal for cell production method.

4 Reduction of product damage

Reduce the product damage or risk of part loss due to frequent removal of storage media, as well as unnecessary work time

Blanco Drive Eraser for ITAD

Market-leading Data Sanitization for HDDs/ SSDs in PCs, Laptops, Chromebooks, and Servers

Technical Specifications

ERASURE	MINIMUM SYSTEM REQUIREMENTS
<ul style="list-style-type: none"> Locally or remotely controlled data erasure via the Blanco Management Console High-speed, simultaneous erasure of multiple drives, including the ability to customize drive batch sizes and drive speed thresholds RAID dismantling and direct access to the underlying physical drives SSD detection and secure erasure with Blanco's patented SSD method Automated detection and unlocking of freeze locked drives Detection, notification and erasure of hidden areas (DCO, HPA) and remapped sectors Support for internal drive erasure commands, including cryptographic erasure and TCG feature set on self-encrypting drives Ability to reformat SATA and SAS drives after erasure 	<ul style="list-style-type: none"> 1 GB RAM memory in most cases (2 GB for PXE booting) Local erasure: <ul style="list-style-type: none"> CD/DVD drive or USB port for booting the software SVGA display and VESA compatible video card USB port for saving reports Remote erasure (requires Blanco Management Console): <ul style="list-style-type: none"> Ethernet NIC DHCP Server running on local network for PXE booting, remote erasure and report collection

USABILITY	REPORTING
<ul style="list-style-type: none"> Accelerated NIST Purge erasure Multi-tasking to allow the hardware diagnostics and updating the report during the erasure time Screensaver displaying the erasure progress to monitor the process remotely Resume an erasure that has been interrupted without consuming extra licenses Dedicated interface for loose drive erasure Support for LAN and WLAN networks, including 802.1x authentication 	<ul style="list-style-type: none"> Digitally-signed Certificate of Erasure Choose between asset level or drive-level reports Save reports locally or send them through the network to the Blanco Management Console Detailed reports enabled by enhanced hardware detection Extensive erasure information, including HDD details for seamless audit procedures User extendable report (with option to add "custom fields")

DEPLOYMENT	HARDWARE DETECTION & DIAGNOSTICS	CONFIGURABILITY & AUTOMATION
<ul style="list-style-type: none"> Blanco Drive Eraser is platform independent Local control with HASP dongles, standalone images, or centralized control through the Blanco Management Console or Blanco Cloud Deploy locally (CD, USB), via the network (PXE), preinstall (Windows, Linux), or via iLO, iDRAC, Cisco UCS, Intel AMT or install locally (appliance mode) 	<ul style="list-style-type: none"> 13+ hardware tests, including: RAM, CPU, Motherboard, Battery (current capacity & discharge), PC Speaker, Display, Pointing Devices, Keyboard, Optical Drive, Webcam, USB Ports, WiFi card, SMART Tests for drives, BIOS logo Hot swap capabilities Backwards compatibility with other Blanco products (BDECT, BMC, BUSBC) 	<ul style="list-style-type: none"> Customize erasure software to fit specific needs Customize input fields in erasure reports 4 levels of process automation: workflow, manual, semi-automatic, automatic Ability to communicate back and forth with an Asset Management System or other external system (IBR workflows) on asset and drive level Fine-tune erasure process (speed/time limit, configurable conditions, etc.) Execute customized workflows defined on the Blanco Management Console or Blanco Cloud, locally or remotely; automate the processing across all company assets

HARDWARE SUPPORT	AUDITING	LANGUAGE SUPPORT
<ul style="list-style-type: none"> Erase data securely from PCs, laptops, servers and storage environments based in x86 and x86-64 architectures BIOS & UEFI machines including Intel-based Macs, Apple T2 and Secure Boot IDE/ATA, SATA, SCSI, SAS, USB, Fibre Channel, FireWire hard disk drives of any size/blocksize SATA and SAS solid state drives of any size/blocksize eMMC drives of any size/blocksize NVMe drives of any size/blocksize SAS, SCSI, ATA and NVMe self-encrypting drives 	<ul style="list-style-type: none"> Verification algorithms to automatically check the overwritten patterns Hexviewer provides fast visual verification of the erasure for compliance Reports offer tamper-proof reporting and can include a customized digital signature Embed reports in the drives for a fast erasure audit Search and export reports via APIs 	<ul style="list-style-type: none"> English, German, Japanese, Chinese, Russian, French, Taiwanese, Italian and Portuguese, Slovak, Polish and Hungarian Up to 20 different keyboard layouts supported

Why Blanco

Blanco is the industry standard in data erasure and mobile device diagnostics software. Blanco data erasure solutions provide thousands of organizations with the tools they need to add an additional layer of security to their endpoint security policies through secure erasure of IT assets. All erasures are verified and certified through a tamper-proof audit trail.

Blanco data erasure solutions have been tested, certified, approved and recommended by 15+ governing bodies and leading organizations around the world. No other data erasure software can boast this level of compliance with the rigorous requirements set by government agencies, legal authorities and independent testing laboratories.

[Get Started Today](#)

Blanco Drive Eraser is a robust data sanitization solution for PC, laptop, Chromebook, server and storage environments.

Organizations concerned with data security and compliance are feeling the pressure to build and maintain robust security policies, safeguard their sensitive data, and dispose of their assets responsibly.

With Blanco Drive Eraser, organizations can add an essential level of protection to endpoint security policies by permanently erasing sensitive data from HDDs and SSDs, including NVMe in desktop/laptop/Chromebook computers and servers.

Our secure overwriting process sanitizes data on a wide variety of storage devices, offering organizations the means for safe re-sale, re-purposing or disposal of data assets at end-of-life.

Key Benefits

- ✔ Guarantees your data has been erased from any drive, from HDDs to SSDs and NVMe, including self-encrypting drives
- ✔ Receive a tamper-proof audit trail for all assets, with a digitally-signed Certificate of Erasure for each erasure instance
- ✔ Process loose drives and Chromebooks with ISO Image Installer, including a report viewer to track progress and specifically designed key diagnostics
- ✔ Increase efficiency and minimize manual processes with Intelligent Business Routing (IBR) workflows (including offline)
- ✔ Generate post-processing labels per asset with Blanco Label Printer
- ✔ Implement hardware tests to assist with diagnostics
- ✔ Full NIST compliance with support for NIST Purge and Clear, featuring full records of unsupported incidents for transparent auditing
- ✔ Support for internal drive erasure commands

Demi PG520

Super Handy SATA Duplicator

Backed by 34 years of expertise and engineering in digital storage technology, built for IT professionals in need of compact duplicator to carry around anywhere, Demi PG520 is a must-have.

Super Compact Platform

The footprint is almost the size of two 3.5" HDD with user-friendly operation control buttons and LCD display. Only 6.9 x 6.7 x 1.2" in handy size, weighing 1.4 lbs.

Multi-Interface Support

It is a great advantage of Demi PG520 supporting SATA II 300MB/s speed in addition to mSATA* and IDE*. High speed copy of 8 seconds/GB (tested).

Cross-Interface Copy

It accommodates migrating old, phasing-out interface drive to new technology in various form factors and interface types. For instance, backing up data from IDE to SATA, or mSATA to SATA. For more see the next page.

Test & Erase Scripts

Demi PG520 sanitizes drives with the method compliant with DoD 5220.22, NSA (National Security Agency) Erase, Security Erase and One-time Erase. Short SMART Self Test Mode quickly tests the drive connected to the target port.

More Than A Duplicator

This tool erases, resizes and diagnoses to get a critical job done just in one small machine.

File System and Error Skip Copy make copy fast

File System Copy Mode duplicates data area formatted in FAT, FAT32, NTFS, EXT2 and EXT3 using MBR and GPT. **Error Skip Copy** skips a weak and unstable sector and continues duplication without endless retries for read/write.

DEMI PG520

FEATURES

- **DUPLICATION** All copy, All copy & compare, All compare, Error skip copy, File system copy & compare, File system copy, File system compare
- **ERASURE** DoD 5220.22 erase, One-time erase, NSA erase, Security Erase, Erase data check
- **DIAGNOSIS** Short SMART self test
- **RESIZE** HPA auto resize, HPA removal
- **DRIVE INFO** Device sense, Device info, Error info

Cross-Interface Copy Options

SPECIFICATIONS

	Descriptions
Model	DEMI PG520
Part No.	Y-2090
Supported Interface	SATA 3 Gbps
Optional Interface	IDE(2.5" 3.5"), mSATA
Port Connections	1 to 1 duplication, 2 x erase, 2 x test

	Descriptions
Dimensions	6.9 x 6.7 x 1.2" (175 x 171 x 31mm)
Weight	1.4 Lb (650g)
Power Specifications	AC 100-240V 50/60Hz
Power Consumption	0.5A 12V
Operating Environment	Temperature 10 - 35°C (50 - 95°F) Humidity 30 - 80% No Condensation

"Trusted by digital technology professionals for over three decades."

Demi YG2022

Compact and Multi Interface Duplicator

Backed by 30 years of experience and engineering in digital storage technology, built for professionals in the IT community demanding full flexibilities in one unit, Demi YG2022 is the answer to their voice.

Multi Interface Support

Native interface SATA 6G and USB3.0 accelerates the process speed to the limit. In addition, Demi YG2022 is capable of connections with **SAS, SCSI** and **Fibre Channel**, not mention to IDE and mSATA (Full and Half Size). 50-68pin and 80-68pin SCSI adapters available.

Latest M.2 and U.2 SSD Support

Demi YG2022 has capabilities for connection of M.2 NVMe/SATA and U.2 NVMe devices via PCIe Gen3 x 4 bus. **72GB/m*** tested read speed by M.2 NVMe device. Proprietary Quick Loader plug-in jig ensures easy yet smooth loading and unloading without damaging any parts. (* varies by model)

NIST 800.88 Standards Compliant

DEMI YG2022 sanitizes drives with a method in compliant with NIST 800.88 standards in addition to DoD 5220.22-M, Security Erase and other scripts. The most requested erasure methods by IT and health care professionals.

Cross-Interface Copy

It helps backing-up old, phasing-out drives to new technology among various interface types. For example, backing up data from SCSI to SATA, or Fibre Channel to SATA. For details see the next page.

Safeguarding Data Against Unintended Overwrite

It would be a shocking moment when realizing critical data is overwritten unintentionally in error! When the master drive is connected in target drive position or the target drive contains data, HIT MG2060 proactively checks before proceeding overwrite and warns the user that the data still exists.

More Than A Duplicator

Multi interface duplication is not the only advantage YG2022 offers. As an all-round capabilities machine, it erases, resizes, and diagnoses, getting critical jobs done just in one unit.

File System and Mapping Copy modes make copy fast

File System Copy Mode duplicates data area only using MBR and GPT. **MAP COPY** function cuts down copy time drastically when copying a large volume. Utilizing the master data information for repeating copy events efficiently.

Data Recovery Copy Modes

ERROR SKIP COPY and **REVERSE COPY** are must-have tools to retrieve as much data as possible from a drive with issues. Error Skip Copy skips a weak sector and continues duplication. Reverse Copy allows for better chances to salvage data from a hard-to-read drive by copying backward from the ending sector. **ADVANCED REVERSE SKIP COPY** is more powerful for this task.

Use Device As External Drive

Drive connected to YG2022 can be mounted as an external master or target drive for PC via Ethernet connection. Master drive is write-protected when being accessed without risking data integrity.

Increase Power With Software

Optional software adds advantages furthermore in using Demi YG2022. It executes a script remotely and creates log files, work reports and CSV database and save them in PC. Sold separately.

DEMI YG2022

FEATURES

- DUPLICATION** All copy, Compare, Error skip copy, Reverse copy, Range copy, Data only copy, Mapping copy, Cross-interface copy
- ERASURE** NIST Purge, Clear, Verify, DoD(3), DoD ECE (7), Security Erase, One time Erase, , NSA (National Security Agency) Method, NCSC (National Counterintelligence & Security Center) Method, US Army Method, US Navy Method, US Air Force Method
- DATA RECOVERY** Bad sector skip copy, Reverse copy, Advanced Skip Copy, Advance Reverse Skip Copy
- DIAGNOSIS** SMART Status, Short and extended self test, Read all and random, Write, Verify all and random, Read-Write-Compare, Cycle test, Test Repair
- RESIZE** HPA, DCO, AMAC, SCSI Format
- DRIVE INFO** Drive info, Partition info, Map data info, Erase map, Error info

SPECIFICATIONS

	Descriptions
Model	DEMI YG2022
Part No.	Y-2260
Supported Interface	SATA 6G USB3.0
Optional Interface	SCSI, Fibre Channel, M.2 NVMe/SATA, U.2 NVMe, mSATA, IDE (SCSI daisy-chained 68-50, 68-80 available)
Port Connections	1 to 1 duplication, 2 x erase, 2 x test
Dimensions	9.8 x 10.2 x 2.2" (250 x 258 x 55mm)
Weight	4.4 Lb (2.0kg)

	Descriptions
Cross-Interface Copy	SATA-SAS-SCSI-FC-mSATA-IDE-USB
Power Specifications	AC 100-240V 50/60Hz
Power Consumption	1.92A (Max)
Communication Port	Ethernet (1000BASE-T / 100BASE-TX / 10BASE-T)
Operating Environment	Temperature 10 - 35°C (50 - 95°F) Humidity 30 - 80%
Logging Port	USB2.0 Type A
Maximum HDD Capacity	SATA: 144PB SAS: 9.4ZB

* The specifications and design of the product are subject to change without notice.

HIT MG2061

SATA & PCIe M.2 Duplicator Eraser

* SATA plug-in jig option available

Backed by 35 years of expertise and engineering in digital storage technology, HIT MG2061 offers advanced M.2/SATA duplication solutions for manufacturing industry and IT professionals.

M.2 and SATA Interface Support

Supporting ultra fast **M.2 NVMe via PCIe Gen3 x4**. 179GB/m* tested read speed by M.2 NVMe device. SATA III and USB 3.0 are supported natively as well. Legacy interface as IDE** and mSATA**, are also supported. (*varies by device) (** optional)

Efficient with M.2 Quick Connect/Eject Plugin and Cooling Fans

YEC's proprietary M.2 Quick Connect/Ejector makes connection quick and easy reliably for M.2 device size of 2230, 2242, 2260, 2280 and 22110. Cooling fans improve data transfer performance. Ask for optional SATA Quick Connect/Eject jig.

Slow Drive Elimination – Reliable Performance

User can specify minimum transfer speed for duplication. When one of the drives performs slower, the total duplication time gets prolonged. In order to avoid speed drop coming from this, HIT MG2061 constantly monitors the data transfer speed of every single target drive during the duplication process. The device slower than the minimum speed will be checked and eliminated from the duplication run automatically thus achieving the fastest completion possible. Using the real-time transfer rate displayed in the control screen, operator can abort the slow drive manually without interrupting other drives being processed as well.

Proactive Data Protection Against Unintended Overwrite

It would be a shocking moment when realizing critical data is overwritten and lost unintentionally! HIT MG2061 proactively checks target drives before proceeding to the overwrite mode and alerts the user of potential eventuality

Reporting

Detailed logs are automatically generated, recording every step of process events. Logs can be utilized for process and error analysis. Simultaneously all process events are saved in **CSV database** useful for various purposes and analyses. **Work Report** template is customizable allowing rearrangement of data field layout as many as needed.

More Than A Duplicator

Multi-interface duplication is not the only advantage MG2061 offers. As an all-round solutions tool, it erases, resizes, and diagnoses to get critical jobs done just in one machine.

NIST 800.88 Sanitize Standards Compliant

NIST 800.88 Purge and Clear scripts are included in addition to DoD 5220.22-M, Security Erase and so on. Great erasure methods for health care and ITAD professionals.

File System and Mapping Copy make copy fast

File System Copy Mode duplicates data area only using MBR and GPT. **MAP COPY** function cuts down copy time drastically when copying a large volume. It utilizes the master data information for repeating copy events efficiently.

Low Maintenance

M.2 jig board is so easy to replace. No tools required. All it takes is remove and put back on with one thumb screw.

Increase Power With Software

Optional software adds advantages furthermore in using HIT MG2061. It executes a script remotely, creates log files, work reports and CSV database and saves them in PC. Sold separately.

See more in the back

IIIT MG2061

FEATURES

- **DUPLICATION** All copy, Compare, Error skip copy, Reverse copy, Range copy, Data only copy, MAP copy, Cross-interface copy
- **ERASURE** NIST 800.88 Purge and Clear, DoD 5220.22-M, Security Erase, One time Erase, Multi-times Erase, NSA (Nat'l Security Agency), NCSC(Nat'l Counterintelligence & Security Center)
- **DIAGNOSIS** SMART Status, Short and extended self test, Read all and random, Write, Verify all and random, Read Write compare, Cycle test, Test Repair
- **RESIZE** HPA, DCO, AMAC
- **DRIVE INFO** Drive info, Map data info, Erase map, Error info
- **CUSTOM SCRIPTING**
- **REPORTING** Detailed process log, work report*, CSV database * (*optional software required)
- **RECOMMENDED USE:** ITAD, Manufacturing, Testing Labs, Health Care, Education, Defense

HIT YG3210

Industrial Grade SATA Duplicator

HIT YG3210

FEATURES

- **DUPLICATION** All copy, All copy & Compare, All compare, Error skip copy, File System copy, File System copy & Compare, File System compare, MAP copy, MAP copy & Compare, MAP compare, HPA all copy, HPA all copy & Compare, HPA File System copy, HPA File System copy & Compare, DCO all copy, DCO all copy & Compare, DCO File System copy, DCO File System copy & Compare
- **ERASURE** DoD5220.22(3), Security Erase, One time and N tme Erase & Compare, NSA (National Security Agency) Method, NCSC (National Counterintelligence & Security Center) Method, US Army Method, US Navy Method, US Air Force Method, Data Compare
- **DIAGNOSIS** All read, Random read, All Verify, Random Verify, Random write, Read & Write & Compare, Running test, Test repair, SMART enable & disable, SMART read data, SMART view data, SMART Status, SMART short test, SMART extended test
- **RESIZE** HPA (MB), HPA (LBA), DCO (MB), DCO (LBA), HPA removal, DCO removal
- **DRIVE INFO** Device sense, Device info, MAP data info, MAP data erase, MAP erase all data, Error info
- **CUSTOM SCRIPTING**
- **REPORTING** Detailed process logs, Work reports*, CSV database* (*Terminal software required)
- **RECOMMENDED USE** Digital cinema distribution, Manufacturing, Defense, Schools and Colleges

Backed by 30 years of engineering and experience in digital media technology, HIT YG3210 performs volume tasks reliably and efficiently in highly demanding industrial and business settings.

Status Indicator LED

Detachable Plug-in Jig Option

Industrial Grade Duplicator
Native SATA III interface at 36GB/m* accelerates copy speed to the limit. Built for high demanding use settings: copying to 20 target drives with one push button operation, cable-less plug-in jig** facilitating quick drive loading and reliable results. HIT YG3210 is in a small footprint with 20 vertically seating bays.

Slow Drive Elimination – Keeping Copy Speed Fast
User can set minimum transfer speed in the Configuration Management. When one of the drives performs slower, the entire duplication time gets prolonged. In order to avoid speed drop coming from it, HIT YG3210 constantly monitors the data transfer speed between the master device and every single device during the duplication process. The device slower than the minimum speed will be checked and eliminated from the duplication event automatically thus achieving the fastest results possible. Since the control panel displays the slowest transfer rate, user can deactivate the slow drive manually from the copy chain without interrupting other drives as well.

18 Duplication Scenarios
HIT YG3210 covers a whole wide range of copy tasks meeting many duplication requirements the user may have. That includes **All Copy & Compare, Error Skip Copy, File System Copy & Compare**, to name just a few.

Proactive Data Protection from Unintended Overwrite
It would be a shocking moment when realizing critical data is overwritten unintentionally in error! When the master drive is connected in target drive position or the target drive contains data, HIT YG3210 proactively checks before proceeding overwrite and warns the user that the data still exists.

More Than A Duplicator
Mass target duplication is not the only advantage HIT YG3210 offers. As an all-round capabilities machine, it diagnoses, erases and resizes, getting demanding jobs done just in one unit.

File System and Mapping Copy modes make copy fast
File System Copy Mode duplicates data area only using MBR and GPT. **MAP COPY** function cuts down copy time drastically when copying a large volume. Utilizing the master data information for repeating copy events efficiently.

Increase Power with Software*
Optional software adds advantages furthermore in using HIT YG3210. It executes a script remotely, creates log files, work reports and CSV database and saves them in PC.

Advantages

- Combo blades with 4mm and 2mm with three step shredding construction.
- Specifically design for office environments.
- Solid hardened steel knives which can shred the hard drives including the data disks.
- Compliance with safety requirements of CE.
- Security switch, auto reverse and cut-off functions to avoid shredding jam
- Bin-full auto sensor, cabinet door open/closed sensor and dust proof closed housing.

Specifications

Model	DEZ-SSD2X2
Shredding method	3 step shredding with 2 * dual shaft shredder
Shredding materials	SSD, Mobile Phone, CD USB, RAM, Card
Blade thickness	First step with 4mm thickness blade, second and third step 2 mm thickness blade
Shredding particle size	2-4mm ²
DIN66399 Level	E4-E5
Insert size	SSD: 120mm* 20mm, CD&chips : 100mm*4mm
Shredding capacity	More than 150 pcs/hr
Power	Single phase 220V-230V/13A
Waste collection bin	20 L
Machine size	965(L) x680(W) x 1307(H) mm
Machine weight	480Kg
Characteristic	With Touch screen and PLC control, soundproof cotton, wooden package
Country of origin	China

* Customized configurations and shredding particle sizes available.

Circuit Board & Chip Disintegrator

High security disintegrator which is designed to shred memory chips and microchips.

Supported Media

Filter system

Specifications

Model	DEZ-SPD2
Destruction method	Shredding and Crushing
Crushing materials	SSD chips, memory chips, Card, ID card, SIM Card or small quantity of CD, DVD
Crushing particle size	0.5*0.5 / 1*1 / 2*2mm ² or customized
Screen mesh size	Replaceable screen mesh for 1mm , 2mm , 3mm to reach different particle size in one machine
Crushing capacity	One pcs of Chip each time
Working capacity	5 – 10kg / hr
Feeding Port	130 x 8 mm
Power	3.12 KW, single phase 220V-230V, 13A , 50HZ
Waste collection Bin	11L
Machine size:	820(L) x 680(W) x 1070(H)mm
Machine weight	About 216Kg
Characteristic	With Touch screen and PLC control, wooden package, Heavy duty wheels, filter

Advantages

- Shred into small partucles.
- Optional shredding particle size with 0.5*0.5 / 1*1 / 2*2 mm² or customized
- To meet higher security requirements for the data destruction.
- Commercial cross-cut shredder is designed for busy professionals.
- Automatically stops and starts for convenience.
- Working capacity more than 5 - 10kg per hour.
- Smart control PLC system.

Shredding Material	E-waste, 3.5 inch HDD, laptop, small printer, PCB, server etc.
Shredding Construction	Two shaft shredder with planetary reducer
Shredding box size	1000 mm
Shredding particle	30 mm * random or customized
DIN66399 Level	T-1, E-2, H-3
Working capacity	2000-3500Kg per hour (based on material)
Motor Power / Voltage / Frequency	Three phase 70KW/380V/50HZ or customized 440-480V/60HZ
Machine Size	12800(L)*3500 (W)*3612.78(H)mm
Machine Weight	6800 Kg
Characteristic	With Touch screen and PLC control, Heavy-duty wheels

* Customized configurations and shredding particle sizes available.

Industrial Cardboard Shredder

Chain Wheel

Motor

Shredding Particle

Control Panel

Side View

Shredding Capacity
500-1000 kg/hr

Max. Feeding Width
1500mm

Max. Thickness
80mm

Advantages

- Triple-shaft design for guaranteed feed of any paper type.
- Long-lasting blades forged from premium, specially hardened steel.
- High-strength, specially profiled blades efficiently capture and destroy cores.
- An intelligent control system ensures safe and reliable operation.
- Integrated with air aspiration and hydraulic baling systems.

Specifications

Model	DEZ-IPS1500
Shredding construction	3
Shredding materials	Cardboard, paper, box and paper core
Max. Cardboard Feeding Width	1500mm
Max. Paper Core Diameter	220mm
Max. Paper Core Thickness	30mm
Max. Cardboard Thickness	80mm
Blade Shaft Rolling Speed	480 r /min
Shredding Capacity	500-1000 KG/hr
Power	15KW /380V Three Phase /60HZ
Waste collection bin	30L
Machine size	2130 (L)x1630 (W)x1849 (H) mm
Machine weight	2800Kg

Data Expert™ Server Hard Disk Shredder

Powerful server hard disk and desktop shredder.

Application

Shredding Particle Size

20*40 - 90mm²

Security Level (DIN 66399)

H-4

Shredding Capacity

More than 300 pcs / hr

* Optional Recording System

Other Advantages

- Special Hardened Cutting Mechanism
- Auto-Sensor Stop
- Auto-Stop by Micom System
- Auto-Stop for Cutter Revolution
- Self-Diagnosis System
- Auto Cleaning
- Door Safety Auto Sensor System
- Auto Control Reverse System
- Manual Function
- Safety Circuit Breaker
- High Quality Geared Motor

Optional Recording System

Waste collection Bin

Shredding size

Feeding Conveyor

Model: DED-SHS

Shredding materials	SSD, HDD, mobile phone, CD, floppy disk, USB drive, tape
Shredding particle size	20 * 40 - 90mm ²
Shredding capacity	More than 300 pcs / hr
Feeding Conveyor	150mm
Motor Power	5HP
Power	3 Phases, 380V/60Hz
Machine size	800(L) x 1120(W) x 1232(H) mm
Machine weight	780Kg
Optional component	Recording System

HDD Crusher

Level H-3 Hard Drive Crusher

Listed on NSA/CSS EPL for Hard Disk Destruction Devices

Model No. : DED-HDC01

- A** Easy to use operator interface
- B** Delivers 12,000 pounds of force

Options and Accessories:

- Spare anvil
- Heavy duty stand
- Dust cover
- Deployment case
- Mobile cart
- Shelf insert for laptop enterprise drives in caddies
- International voltage
- At-site set-up, installation, training
- Preventive maintenance contract
- Extended warranty

Specifications:

Speed	8 seconds per cycle
NSA Durability Rating	204 drives per hour
HDD Capacity per Cycle — PC / Server	1 HDD up to 1.85" thick
HDD Capacity per Cycle — Notebook	4 standard notebook HDDs or 6 ultra-thin HDDs
Media Dimensions	Up to 5.625"W x 1.85"H x 9"D
Electrical	115/1/60 International voltage available
Power Consumption / HP	7 Amps @120V / 1/3 HP – single phase
Dimensions – HxWxD	22" x 10" x 19"
Weight	115 lbs.
Warranty	1 year non-wear parts/90 days labor

Standard Features:

- Destroys all hard drives regardless of size, format, or type up to 1.85" thick
- **Drives mounted in caddies used in most rack mount server environments can be crushed without having to remove them from the caddies**
- Delivers 12,000 pounds of force, causing catastrophic trauma by bending and boring a hole through the drive while also destroying the data holding platters
- Safety interlocks prevent the unit from operating with the door open
- Made in the USA — TAA compliant

HDD Crusher

Level H-3 Hard Drive Crusher

Listed on NSA/CSS EPL for Hard Disk Destruction Devices

CONFIGURATIONS

0101-SSDKIT

Includes an SSD anvil along with wear and press plates that are factory installed in the 0101 crusher to destroy SSD data storage controller boards. Kit includes SSD anvil, wear plate and press plate. Must be ordered at time of purchase, no retrofitting available. Weight: 120 lbs.

0101-DEP

Includes a hard case with custom foam inserts, lockable latches, heavy duty casters, and removable front and rear panels that allow for operation while in case.

Dimensions: 31"H x 15.5"W x 24"D
 Weight (empty): 64 lbs.
 Weight (with 0101): 184 lbs.

DED-OMS01

Level 0-5 Optical Media Shredder

NSA/CSS EPL Listed for CDs

Global Leader in High Security Information
End-of-Life Solutions for Over 50 Years

Specifications:

Media Accepted	Optical media (CDs, DVDs, BDs)
Final Particle Size	2.2mm x 4mm
Hourly Throughput	Up to 1,583 discs
Media Feed Opening	4.72 in. 12cm
Waste Collection Bin	15 gallon
Dimensions (HxWxD)	40 in. x 21.5 in. x 23.35 in.
Weight	231 lbs.
Electrical	120/1/60 or 220/1/50 Requires dedicated line
Power	1HP
Warranty	1 year non-wear parts/90 days labor

Standard Features:

- NSA EPL listed for CD destruction
- Waste bin full/door open indicator with auto stop
- Energy savings mode shuts off power when not in use
- Ideal for other unclassified items such as DVDs, Blu-ray Discs, credit cards and access cards
- TAA compliant
- Includes premium start-up package with two one-gallon oil jugs and 50 anti-static waste collection bags*
- 1-gallon auto oiler prevents the need for manual lubrication*
- 15-gallon collection bin allows for more shredding before changing bags*
- Easy button controls with feed meter and reverse button*
- Anti-static waste bin and anti-static bags*

*Unique to SEM

Options and Accessories:

- Anti-static collection bags
- Oil packs

0201-DEP

The deployment case is rugged and incorporates custom filled foam inserts for maximum protection. It is lockable and water-tight with a telescopic handle and wheels.
