

Industrial E-Waste Shredder

HDD
 Computer
 Printer
 PCB
 E-Waste

Shredding Particle Size
 30mm* Random

Security (DIN 66399)
 T - 1 H - 3
 E - 2

Shredding Capacity
 2000-3500Kg / hr

Advantages

- With 1000mm shredding box size suitable for large material shredding.
- With high level material blade to shred hard item.
- With durable blades and corrosion resistance feature.
- Safety and ease of operation.
- The equipment features a working capacity of 2000 to 3500 kg per hour, making it ideal for heavy-duty processing.

Specifications

Model	DEZ-SPT10
Shredding Material	E-waste, 3.5 inch HDD, laptop, small printer, PCB, server etc.
Shredding Construction	Two shaft shredder with planetary reducer
Shredding box size	1000 mm
Shredding particle	30 mm * random or customized
DIN66399 Level	T-1, E-2, H-3
Working capacity	2000-3500Kg per hour (based on material)
Motor Power / Voltage / Frequency	Three phase 70KW/380V/50HZ or customized 440-480V/60HZ
Machine Size	12800(L)*3500 (W)*3612.78(H)mm
Machine Weight	6800 Kg
Characteristic	With Touch screen and PLC control, Heavy-duty wheels

* Customized configurations and shredding particle sizes available.
