

Chip-off Data Recovery & Digital Forensic analysis of broken flash storage devices.

Application

	Firmware X
Physical Damage	Firmware Failure
	
Electrical Damage	Thermal Damage
	Recognize X
Analysis "non-addressed areas"	Non-recognizable disk

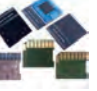

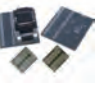

Workflow

-  Put the chip into the adapter
-  Connect the adapter to the reader and press "Read memory chips."
-  Binary dump file of physical image is produced
-  Rearrange the physical NAND blocks into the logical block by using VNR software
-  Full file-system structure is shown

Features

- Data recovery from broken Flash devices
- Forensic analysis of NAND physical image
- Analysis of hidden/obsolete/bad blocks of NAND memory
- Automatic analysis modes
- Largest set of adapters on market
- Powerful manual analysis and reverse engineering modes
- Unique dump viewer modes
- Support of microSD and other monolithic devices
- Flexible software conception and intuitive GUI with database
- Power adjustment for weak and mobile chips (1.8V...4.0V) separately for core and IO bus

Options

Starter Kit	Standard Kit	EMMC Adapter Kit	Monolithic NAND Adapters
